This Statement of Additional Information (the "SAI") supplements the prospectus dated September 1, 2018, as it may be amended from time to time (the "Prospectus"), offering shares of the Monongahela All Cap Value Fund (the "Fund"), a separate series of Forum Funds (the "Trust"). This SAI is not a prospectus and should only be read in conjunction with the Prospectus. You may obtain the Prospectus without charge by contacting Atlantic Fund Administration, LLC (d/b/a Atlantic Fund Services) ("Atlantic" or "Administrator") at the address, telephone number or e-mail address listed above. You may also obtain the Prospectus on the Fund's website listed above. This SAI is incorporated by reference into the Fund's Prospectus. In other words, it is legally a part of the Prospectus.

Financial statements for the Fund for the year ended April 30, 2018 are included in the Annual Report to shareholders and are incorporated into this SAI by reference. Copies of the Fund's Annual Report may be obtained without charge and upon request, by contacting Atlantic at the address, telephone number or e-mail address listed above. You may also obtain copies of the Fund's most recent Annual Report and Semi-Annual Report on the Fund's website listed above.

KEY DEFINED TERMS

As used in this SAI, the following terms have the meanings listed.

“1933 Act” means the Securities Act of 1933, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“Adviser” means Monongahela Capital Management, the Fund’s investment adviser.

“Board” means the Board of Trustees of the Trust.

“Independent Trustees” means trustees who are not interested persons of the Trust, as defined in Section 2(a)(19) of the 1940 Act.

“IRC” means the Internal Revenue Code of 1986, as amended.

“IRS” means the Internal Revenue Service.

“NAV” means net asset value per share.

“RIC” means a domestic corporation qualified as a “regulated investment company” (as defined in Subchapter M of Chapter 1, Subtitle A, of the IRC).

“SEC” means the U.S. Securities and Exchange Commission.

INVESTMENT POLICIES AND RISKS

The Fund is a diversified open-ended series of the Trust. This section supplements, and should be read in conjunction with, the Prospectus. The following are descriptions of the investments and investment practices that the Fund may pursue (in addition to those described in the Prospectus) and the associated risks. Please see the Prospectus for a discussion of the Fund's investment objective, principal investment strategies and principal risks.

A. Security Ratings Information

The Fund's investments in fixed-income, preferred stock and convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities. To limit credit risk, the Fund may only purchase investment grade fixed income, preferred and convertible securities. Investment grade means rated in the top four long-term rating categories or unrated and determined by the Adviser to be of comparable quality. Unrated securities may not be as actively traded as rated securities. The lowest ratings that are investment grade for corporate bonds, including convertible securities, are "Baa" in the case of Moody's Investors Service, Inc. ("Moody's") and "BBB" in the cases of Standard & Poor's Financial Services, LLC, a division of the McGraw-Hill Companies, Inc. ("S&P") and Fitch, Inc. ("Fitch"); for preferred stock the lowest ratings are "Baa" in the case of Moody's and "BBB" in the cases of S&P and Fitch.

The Fund may retain securities whose ratings have declined below the lowest permissible rating category if the Adviser determines that retaining such security is in the best interests of the Fund. The Fund, nonetheless, will not hold more than 5% of the value of its net assets in non-investment grade debt securities.

Moody's, S&P, Fitch and other organizations, together known as Nationally Recognized Statistical Rating Organizations ("NRSROs"), provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities is included in Appendix A to this SAI. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. An issuer's current financial condition may be better or worse than a rating indicates.

B. Equity Securities

Common and Preferred Stock. The Fund may invest in common and preferred stock. Common stock represents an ownership interest in a company and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's common stock price. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends or the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights. Preferred stock is subject to the risks associated with other types of equity securities, as well as additional risks, such as credit risk, interest rate risk, potentially greater volatility and risks related to deferral, non-cumulative dividends, subordination, liquidity, limited voting rights, and special redemption rights.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. This may not be true currently or in the future. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measure of a company's worth. If you invest in the Fund, you should be willing to accept the risks of the stock market and should consider an investment in the Fund only as a part of your overall investment portfolio.

Convertible Securities. The Fund may invest in convertible securities. Convertible securities include fixed-income securities, preferred stock or other securities that may be converted into or exchanged for a given amount of common stock of the same or a different issuer during a specified period and at a specified price in the future. A convertible security entitles the holder to receive interest on debt or the dividend on preferred stock until the convertible security matures or is redeemed, converted or exchanged.

Investments in convertible securities generally entail less risk than an investment in the issuer's common stock because convertible securities rank senior to common stock in a company's capital structure but are usually subordinated to comparable non-convertible securities. Convertible securities have unique investment characteristics in that they generally:

(1) have higher yields than the underlying common stock, but lower yields than comparable non-convertible securities; (2) are less subject to fluctuation in value than the underlying common stock since they have fixed-income characteristics; and (3) provide the potential for capital appreciation if the market price of the underlying common stock increases.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party.

Convertible securities are typically issued by smaller capitalization companies whose stock price may be volatile. Therefore, the price of a convertible security may reflect variations in the price of the underlying common stock in a way that non-convertible debt does not. The extent to which such risk is reduced, however, depends in large measure upon the degree to which the convertible security sells above its value as a fixed-income security.

Warrants and Rights. The Fund may invest in warrants and rights. Warrants are securities, typically issued with preferred stock or bonds, that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends and have no rights with respect to the assets of the issuer. A stock right is an option given to a shareholder to buy additional shares at a predetermined price during a specified time. The Fund will limit its purchases of warrants to not more than 5% of the value of its net assets. The Fund may also invest up to 5% of its net assets in stock rights.

Investments in warrants and rights involve certain risks, including the possible lack of a liquid market for the resale of the warrants and rights, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

American Depositary Receipts. The Fund may invest up to 25% of its net assets in sponsored and unsponsored American Depositary Receipts ("ADRs"). ADRs typically are issued by a U.S. bank or trust company, evidence ownership of underlying securities issued by a foreign company, and are designed for use in U.S. securities markets. The Fund may invest in ADRs in order to obtain exposure to foreign securities markets. In a sponsored depositary arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary's transaction fees. In an unsponsored arrangement, the foreign issuer assumes no obligations and the depositary's transaction fees are paid by the depositary holder.

Unsponsored depositary receipts may be created without the participation of the foreign issuer. Holders of these receipts generally bear all the costs of the depositary receipt facility, whereas foreign issuers typically bear certain costs in a sponsored depositary receipt. The bank or trust company depositary of an unsponsored depositary receipt may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Accordingly, available information concerning the issuer may not be current, and the prices of unsponsored depositary receipts may be more volatile than the prices of sponsored depositary receipts.

ADRs may involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards in some foreign markets and fluctuations in foreign currencies. The securities underlying ADRs are typically denominated (or quoted) in a currency other than U.S. dollars. As a result, changes in foreign currency exchange rates affect the value of the Fund's portfolio. Generally, when the U.S. dollar rises in value against a foreign currency, a security denominated in that currency loses value because the currency is worth fewer U.S. dollars; conversely, when the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency gains value because the currency is worth more U.S. dollars. This risk means that a strong U.S. dollar may reduce returns for U.S. investors, while a weak U.S. dollar may increase those returns. In addition, the securities underlying ADRs may trade on foreign exchanges at times when the U.S. markets are not open for trading. As a result, the value of ADRs representing those underlying securities may change materially at times when U.S. markets are not open for trading.

C. Fixed-Income Securities

Corporate Debt Obligations. The Fund may invest in corporate debt obligations. Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. Companies use these instruments to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must repay the amount borrowed at maturity. Commercial paper (short-term unsecured promissory notes) is issued by companies to finance their current obligations and normally has a maturity of less than nine months. In addition, the Fund may invest in corporate debt obligations registered and sold in the U.S. by foreign issuers (sometimes called Yankee bonds) and those

sold outside the U.S. by foreign or U.S. issuers (sometimes called Eurobonds). To the extent it invests in corporate debt obligations, the Fund intends to restrict its purchases of these securities to issues denominated and payable in U.S. dollars.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. The Fund considers U.S. Government Securities to include: (1) U.S. Treasury obligations (which differ only in their interest rates and maturities), (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are backed by the full faith and credit of the U.S. Government (such as securities issued by the Federal Housing Administration (“FHA”), Government National Mortgage Association (“GNMA”), the Department of Housing and Urban Development, the Export-Import Bank, the General Services Administration and the Maritime Administration and certain securities issued by the FHA and the Small Business Administration) and (3) securities that are guaranteed by agencies or instrumentalities of the U.S. Government but are not backed by the full faith and credit of the U.S. Government (such as the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”) or the Federal Home Loan Banks). These U.S. Government-sponsored entities, which although chartered and sponsored by Congress, are not guaranteed nor insured by the U.S. Government. They are supported by the credit of the issuing agency, instrumentality or corporation. The range of maturities of U.S. Government Securities is usually three months to thirty years. In general, the U.S. Government Securities tend to carry less interest rate risk than corporate bonds with similar maturities.

In September 2008, the U.S. Treasury and the Federal Housing Finance Agency (“FHFA”) announced that Fannie Mae and Freddie Mac had been placed in conservatorship. Since that time, Fannie Mae and Freddie Mac have received significant capital support through U.S. Treasury preferred stock purchases, and Treasury and Federal Reserve purchases of their mortgage-backed securities (“MBS”). The FHFA and the U.S. Treasury (through its agreement to purchase Freddie Mac and Fannie Mae preferred stock) have imposed strict limits on the size of their mortgage portfolios. While the MBS purchase programs ended in 2010, the U.S. Treasury continued its support for the entities' capital as necessary to prevent a negative net worth through at least 2012. When a credit rating agency downgraded long-term U.S. Government debt in August 2011, the agency also downgraded Fannie Mae and Freddie Mac's bond ratings, from AAA to AA+, based on their direct reliance on the U.S. Government (although that rating did not directly relate to their MBS). From the end of 2007 through the fourth quarter of 2017, Fannie Mae and Freddie Mac required U.S. Treasury support of approximately \$187.5 billion through draws under the preferred stock purchase agreements. However, Fannie Mae and Freddie Mac have paid approximately \$278.8 billion in aggregate cash dividends to the U.S. Treasury over the same period (although those payments do not constitute a repayment under their draws). In the first quarter of 2018, Fannie Mae and Freddie Mac each reported that the passage of the Tax Cuts and Jobs Act in December 2017 had resulted in a decrease in the value of their deferred tax assets. As a result, Fannie Mae and Freddie Mac each reported net losses during the fourth quarter of 2017 and indicated that they would request draws from the U.S. Treasury in the amount of \$3.7 billion and \$0.3 billion, respectively. No assurance can be given that any Federal Reserve, U.S. Treasury, or FHFA initiatives will ensure that Freddie Mac and Fannie Mae will remain successful in meeting their obligations with respect to the debt and mortgage-backed securities they issue beyond that date.

In addition, the problems faced by Fannie Mae and Freddie Mac, resulting in their being placed into federal conservatorship and receiving significant U.S. Government support, have sparked serious debate among federal policy makers regarding the continued role of the U.S. Government in providing liquidity for mortgage loans. In December 2011, Congress enacted the Temporary Payroll Tax Cut Continuation Act of 2011 which, among other provisions, requires that Fannie Mae and Freddie Mac increase their single-family guaranty fees by at least 10 basis points and remit this increase to the U.S. Treasury with respect to all loans acquired by Fannie Mae or Freddie Mac on or after April 1, 2012 and before January 1, 2022. Serious discussions among policymakers continue, however, as to whether Fannie Mae and Freddie Mac should be nationalized, privatized, restructured or eliminated altogether. Fannie Mae reported in the second quarter of 2014 that there was "significant uncertainty regarding the future of our company, including how long the company will continue to exist in its current form, the extent of our role in the market, what form we will have, and what ownership interest, if any, our current common and preferred stockholders will hold in us after the conservatorship is terminated and whether we will continue to exist following conservatorship." Freddie Mac faces similar uncertainty about its future role. Fannie Mae and Freddie Mac also are the subject of several continuing legal actions and investigations over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may continue to have an adverse effect on the guaranteeing entities.

The Fund may also invest in separated or divided U.S. Government Securities. These instruments represent a single interest, or principal, payment on a U.S. Government Security that has been separated from all the other interest payments and the security itself. When the Fund purchases such an instrument, it purchases the right to receive a single payment of a set sum at a known date in the future. The interest rate on such an instrument is determined by the price the Fund pays for the instrument when it purchases the instrument at a discount under what the instrument entitles the Fund to receive when the instrument matures. The amount of the discount the Fund will receive will depend upon the length of time to maturity of the

separated U.S. Government Security and prevailing market interest rates when the separated U.S. Government Security is purchased. Separated U.S. Government Securities can be considered zero coupon investments because no payment is made to the Fund until maturity. The market values of these securities are much more susceptible to change in market interest rates than income-producing securities. These securities are purchased with original issue discount and such discount is includable as gross income to a Fund shareholder over the life of the security.

The Fund may also purchase certificates not issued by the U.S. Department of the Treasury, which evidence ownership of future interest, principal or interest and principal payments on obligations issued by the U.S. Department of the Treasury. The actual U.S. Treasury securities will be held by a custodian on behalf of the certificate holder. These certificates are purchased with original issue discount and are subject to greater fluctuations in market value, based upon changes in market interest rates, than income-producing securities.

Risks of Fixed-Income Securities. The market value of the interest-bearing fixed-income securities held by the Fund will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity (and duration) of a security, the more sensitive the security is to changes in interest rates. All fixed-income securities can change in value when there is a change in interest rates. In addition, certain fixed-income securities may be subject to extension risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security's maturity.

Yields on fixed-income securities are dependent on a variety of factors, including the general conditions of the fixed-income securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. Fixed-income securities with longer maturities tend to produce higher yields and are generally subject to greater price movements than obligations with shorter maturities.

The issuers of fixed-income securities are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its fixed-income securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its fixed-income securities may become impaired.

D. Repurchase Agreements

The Fund may enter into repurchase agreements. Repurchase agreements are transactions in which the Fund purchases securities from a bank or securities dealer and simultaneously commits to resell the securities to the bank or dealer on an agreed-upon date and at a price reflecting a market rate of interest unrelated to the purchased security. During the term of a repurchase agreement, the Fund's custodian, subcustodian or tri-party custodian maintains possession of the purchased securities and any underlying collateral, which is maintained at not less than 100% of the repurchase price. Repurchase agreements allow the Fund to earn income for periods as short as overnight, while retaining the flexibility to pursue longer-term investments. The Fund will not invest more than 5% of its net assets in repurchase agreements.

Repurchase agreements involve credit risk. In the event that bankruptcy, insolvency or similar proceedings are commenced against a counterparty, the Fund may have difficulty exercising its rights to the underlying securities. The Fund may incur costs and expensive time delays in disposing of the underlying securities and it may suffer a loss. Failure by the other party to deliver a security or currency purchased by or lent by the Fund may result in a missed opportunity to make an alternative investment. Favorable insolvency laws that allow the Fund, among other things, to liquidate the collateral held in the event of the bankruptcy of the counterparty reduce counterparty insolvency risk with respect to repurchase agreements. The Fund will only enter a repurchase agreement with a seller that the Adviser believes presents minimal credit risk.

E. Illiquid and Restricted Securities

The term "illiquid securities" means securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities. The Fund will not invest more than 15% of its net assets in illiquid securities. If illiquid securities exceed 15% of the Fund's net assets after the time of purchase, the Fund will take steps to reduce in an orderly fashion its holdings of illiquid securities. Illiquid securities include: (1) repurchase agreements not entitling the holder to payment of principal within seven days; (2) over-the-counter options; (3) securities that cannot be disposed of within seven days at their then-current value; and (4) securities subject to restrictions on resale because they have not been registered under the 1933 Act ("Restricted Securities").

An institutional market has developed for certain Restricted Securities. For example, such securities may be eligible for purchase by institutional buyers in accordance with Rule 144A under the 1933 Act or other exemptions and the Adviser may

determine that the securities are liquid. Accordingly, contractual or legal restrictions on their resale may not be indicative of the liquidity of the security. The Fund may consider these and other securities as liquid pursuant to guidelines adopted by the Board.

Any security, including securities determined by the Adviser to be liquid, can become illiquid. Limitations on resale may have an adverse effect on the marketability of a security. The Fund might also have to request that an issuer register a restricted security in order to dispose of it, resulting in expense and delay. Generally, the Fund would not have the right to require an issuer to register a restricted security. The Fund might not be able to dispose of restricted or illiquid securities promptly or at reasonable prices and might thereby experience a loss or have difficulty satisfying redemptions. There can be no assurance that a market will exist for any illiquid security at any particular time.

Determination of Liquidity. The Board has the ultimate responsibility for determining whether specific securities are liquid and has delegated this responsibility to the Adviser, pursuant to guidelines approved by the Board. The Adviser determines and monitors the liquidity of Fund assets under management and reports periodically on its decisions to the Board. The Adviser takes into account a number of factors in reaching liquidity decisions, including but not limited to: (1) the frequency of trades and quotations for the security; (2) the number of dealers willing to purchase or sell the security and the number of other potential buyers; (3) the willingness of broker-dealers to undertake to make a market in the security; and (4) the nature of the marketplace trades, including the time needed to dispose of the security, the method of soliciting offers, and the mechanics of the transfer. If illiquid securities exceed 15% of the Fund's net assets after the time of purchase, the Fund will take steps to reduce in an orderly fashion its holdings of illiquid securities.

F. Foreign Securities

The Fund may invest in foreign securities, including common stock and common stock equivalents, preferred stock and fixed-income securities. Foreign fixed-income securities include corporate debt obligations issued by foreign companies and debt obligations of foreign governments or international organizations. Foreign government obligations may or may not be backed by the national government's full faith and credit and general taxing powers. Foreign fixed-income securities may also include floating and variable rate obligations, Yankee dollar obligations (U.S. dollar denominated obligations issued by foreign companies and traded on U.S. markets) and Eurodollar obligations (U.S. dollar denominated obligations issued by foreign companies and traded on foreign markets).

Risks. Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of U.S. issuers. All foreign investments are subject to risks of: (1) foreign political and economic instability; (2) adverse movements in foreign exchange rates; (3) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; and (4) changes in foreign governmental attitudes towards private investment, including potential nationalization, increased taxation or confiscation of the Fund's assets.

In addition, dividends and interest payable on foreign securities may be subject to foreign withholding taxes, thereby reducing the income available for distribution or reinvestment by the Fund. Some foreign brokerage commission and custody fees are higher than in the U.S. Foreign accounting, auditing and financial reporting standards differ from those in the U.S., and therefore, less information may be available about foreign companies than is available about issuers of comparable U.S. companies. Foreign securities also may trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the U.S. dollar value of all foreign currency-denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the U.S., many of which may be difficult, if not impossible, to predict.

Income from foreign securities will be received and realized in foreign currencies, and the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar after the Fund's income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. dollars and the time such expenses are paid, the Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

Brexit. On June 23, 2016, the United Kingdom voted via referendum to leave the European Union ("EU"), which immediately led to significant market volatility around the world, as well as political, economic, and legal uncertainty. On March 29, 2017, Prime Minister Theresa May provided formal notification of the United Kingdom's intention to withdraw

from the EU pursuant to Article 50 of the Treaty of Lisbon to the EU. The United Kingdom is scheduled to leave the EU on March 29, 2019, at which date a 21-month “transition” period will begin. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom’s exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues, and countries whose economies rely on international trade. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties. These developments could have a material adverse effect on the secondary market for securities in which the Fund invests and could result in significantly reduced liquidity.

G. Options

The Fund may purchase or write put and call options to: (1) enhance the Fund’s performance; or (2) to hedge against a decline in the value of securities owned by the Fund or an increase in the price of securities that the Fund plans to purchase. The Fund may purchase or write options on securities in which it may invest or on market indices based in whole or in part on such securities. Options purchased or written by the Fund must be traded on an exchange or over-the-counter.

Use of these instruments is subject to regulation by the SEC, the options exchanges on which options are traded. No assurance can be given that any hedging or income strategy will achieve its intended result.

Currently the Fund has no intention of investing in options for purposes other than hedging. The Fund will comply with SEC guidelines with respect to coverage of certain strategies and, if the guidelines require, will set aside cash, liquid securities and other permissible assets (“Segregated Assets”) on the books and records of the Fund or in a segregated account with the custodian in the prescribed amount. Segregated Assets cannot be sold or closed out while the strategy is outstanding, unless the Segregated Assets are replaced with similar assets. As a result, there is a possibility that the use of cover or segregation involving a large percentage of the Fund’s assets could impede portfolio management or the Fund’s ability to meet redemption requests or other current obligations.

Options on Securities. A call option is a contract under which the purchaser of the call option, in return for a premium paid, has the right to buy the security (or index) underlying the option at a specified exercise price at any time during the term of the option. The writer of the call option, who receives the premium, has the obligation upon exercise of the option to deliver the underlying security against payment of the exercise price. A put option gives its purchaser, in return for a premium, the right to sell the underlying security at a specified price during the term of the option. The writer of the put, who receives the premium, has the obligation to buy, upon exercise of the option, the underlying security (or a cash amount equal to its value) at the exercise price. The amount of a premium received or paid for an option is based upon certain factors including the market price of the underlying security, the relationship of the exercise price to the market price, the historical price volatility of the underlying security, the option period and interest rates.

Risks of Options Transactions. There are certain investment risks associated with options transactions. These risks include: (1) dependence on the Adviser’s ability to predict movements in the prices of individual securities and fluctuations in the general securities markets; (2) imperfect correlation between movements in the prices of options and movements in the price of the securities (or indices) hedged or used for cover which may cause a given hedge not to achieve its objective; (3) the fact that the skills and techniques needed to trade these instruments are different from those needed to select the securities in which the Fund invests; and (4) lack of assurance that a liquid secondary market will exist for any particular instrument at any particular time, which, among other things, may hinder the Fund’s ability to limit exposures by closing its positions. The potential loss to the Fund from investing in certain types of futures transactions is unlimited.

Other risks include the inability of the Fund, as the writer of covered call options, to benefit from any appreciation of the underlying securities above the exercise price, and the possible loss of the entire premium paid for options purchased by the Fund. There is no assurance that a counterparty in an over-the-counter option transaction will be able to perform its obligations.

The Fund’s activities in the options markets may result in higher portfolio turnover rates and additional brokerage costs, which could reduce the Fund’s return.

Historically, an adviser of a fund trading commodity interests (such as futures contracts, options on futures contracts, non-deliverable forwards, swaps and cash-settled foreign currency contracts) has been excluded from regulation as a commodity

pool operator (“CPO”) pursuant to Commodity Futures Trading Commission (“CFTC”) Regulation 4.5. In 2012, the CFTC amended Regulation 4.5 to dramatically narrow this exclusion.

Under the amended Regulation 4.5 exclusion, a fund’s commodity interests – other than those used for bona fide hedging purposes (as defined by the CFTC) – must be limited such that the aggregate initial margin and premiums required to establish the positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options are “in-the-money” at the time of purchase) do not exceed 5% of the fund’s NAV, or alternatively, the aggregate net notional value of the positions, determined at the time that the most recent position was established, does not exceed 100% of the fund’s NAV (after taking into account unrealized profits and unrealized losses on any such positions). Further, to qualify for the exclusion in amended Regulation 4.5, a fund must satisfy a marketing test, which requires, among other things, that the fund not hold itself out as a vehicle for trading commodity interests.

The Fund does not trade any commodity interests, such as futures contracts, options on futures contracts, non-deliverable forwards, swaps and cash-settled foreign currency contracts. Therefore, it does not need to, and does not, rely on the exclusion in CFTC Regulation 4.5 to avoid regulation as a CPO.

H. Leverage Transactions

The Fund may use leverage to increase potential returns. Leverage involves special risks and may involve speculative investment techniques. Leverage exists when cash made available to the Fund through an investment technique is used to make additional Fund investments. Leverage transactions include borrowings for other than temporary or emergency purposes, purchasing securities on margin (borrowing money from a bank to purchase securities), selling securities short (selling securities that are not owned), lending portfolio securities, entering into reverse repurchase agreements, dollar rolls and purchasing securities on a when-issued, delayed delivery or forward commitment basis.

Securities Lending and Repurchase Agreements. The Fund may lend portfolio securities for income to brokers, dealers and other financial institutions. In a portfolio securities lending transaction, the Fund receives from the borrower an amount equal to the interest paid or the dividends declared on the loaned securities during the term of the loan and the interest on the collateral securities, less any fees (such as finders or administrative fees) that the Fund pays in arranging the loan. The Fund may share the interest it receives on the collateral securities with the borrower. The terms of the Fund’s loans permit the Fund to reacquire loaned securities on five business days’ notice or in time to vote on any important matter. Loans are subject to termination at the option of the Fund or the borrower at any time, and the borrowed securities must be returned when the loan is terminated. The Fund may pay fees to arrange for securities loans.

The Fund may enter into repurchase agreements. Repurchase agreements are transactions in which the Fund purchases a security and simultaneously agrees to resell that security to the seller at an agreed upon price on an agreed upon future date, normally, one to seven days later. If the Fund enters into a repurchase agreement, it will maintain possession of the purchased securities and any underlying collateral.

Securities loans and repurchase agreements must be continuously collateralized, and the collateral must have market value at least equal to the value of the Fund’s loaned securities, plus accrued interest or, in the case of repurchase agreements, equal to the repurchase price of the securities, plus accrued interest.

Borrowing and Reverse Repurchase Agreements. The Fund may borrow money from a bank in amounts up to 33⅓% of its total assets at the time of borrowing to, among other things, finance the purchase of securities for its portfolio. Pledging securities and purchasing securities on a when-issued, delayed-delivery or forward-delivery basis are subject to this limitation. The Fund will not invest more than 5% of its net assets in reverse repurchase agreements. A reverse repurchase agreement is a transaction in which the Fund sells securities to a bank or securities dealer and simultaneously commits to repurchase the securities from the bank or dealer at an agreed-upon date and at a price reflecting a market rate of interest unrelated to the sold securities. An investment of the Fund’s assets in reverse repurchase agreements will increase the volatility of the Fund’s NAV. A counterparty to a reverse repurchase agreement must be a primary dealer that reports to the Federal Reserve Bank of New York or one of the largest 100 commercial banks in the United States.

Senior Securities. Pursuant to Section 18(f)(1) of the 1940 Act and any rules, regulations and SEC interpretations, and any exemptive orders or interpretive release promulgated thereunder, the Fund may not issue any class of senior security or sell any senior security of which it is the issuer, except that the Fund shall be permitted to borrow from any bank so long as immediately after such borrowings, there is an asset coverage of at least 300% and that in the event that such asset coverage falls below this percentage, the Fund shall reduce the amount of its borrowings within three days (excluding Sundays and holidays) so that asset coverage is at least 300%.

Short Sales. In a short sale, the Fund will borrow a security from a broker, sell it and maintain the proceeds of the transaction in its brokerage account. The broker would charge the Fund interest during the period it borrows the security. The Fund may close out the short sale by purchasing the security in the open market at market price. If the proceeds received from the short sale (less the interest charges) exceed the amount paid for the security, the Fund will realize a gain on the transaction. If the proceeds received from the short sale (less interest charges) are less than the amount paid for the security, the Fund will realize a loss on the transaction. The Fund will limit its short sales so that no more than 5% of its net assets (less all liabilities other than proceeds from the short sales) will be deposited as collateral in and allocated to the segregated account.

When-Issued Securities and Forward Commitments. The Fund may purchase securities offered on a “when-issued” and “forward commitment basis” (including a delayed delivery basis). Securities purchased on a “when-issued” or “forward commitment basis” are securities not available for immediate delivery despite the fact that a market exists for those securities. A purchase is made on a “delayed delivery” basis when the transaction is structured to occur sometime in the future.

When these transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. Normally, the settlement date occurs within two months after the transaction, but delayed settlements beyond two months may be negotiated. During the period between a commitment and settlement, no payment is made for the securities purchased by the purchaser and, thus, no interest accrues to the purchaser from the transaction.

At the time the Fund makes the commitment to purchase securities on a when-issued basis, the Fund will record the transaction as a purchase and thereafter reflect the value each day of such securities in determining its NAV.

In short, the Fund immediately assumes the risk of ownership, including the risk that the value of the security may decline. The use of when-issued transactions enables the Fund to protect against anticipated changes in interest rates and prices, but may increase the volatility of the Fund’s NAV. Failure by a counterparty to deliver a security purchased by the Fund on a when-issued or delayed-delivery basis may result in a loss to the Fund or a missed opportunity to make an alternative investment. Although the Fund will generally enter into these transactions with the intent of acquiring securities for its portfolio, the Fund may dispose of a commitment prior to the settlement if the Adviser deems it appropriate. The Fund will not invest more than 25% of its total assets in when-issued or delayed-delivery securities.

Segregated Assets. The Fund will comply with SEC guidance with respect to certain strategies and, if the required, will set aside on its books and records, cash and liquid securities (“Segregated Assets”) in the prescribed amount. The value of the Segregated Assets, which is marked to market daily, will be at least equal to the Fund’s commitments under these transactions less any margin on deposit. Segregated Assets cannot be sold while the strategy is outstanding, unless the Segregated Assets are replaced with like assets. As a result, there is a possibility that the use of segregation could impede portfolio management.

Risks of Leverage Transactions. Leverage creates the risk of magnified capital losses. Leverage may involve the creation of a liability that requires the Fund to pay interest (for instance, reverse repurchase agreements) or the creation of a liability that does not entail any interest costs (for instance, forward commitment costs).

The risks of leverage include a higher volatility of the Fund’s NAV, which may be magnified by favorable or adverse market movements or changes in the cost of cash and the yield from invested cash. So long as the Fund is able to realize a net return on its investment portfolio that is higher than interest expense incurred, if any, leverage will result in higher current net investment income for the Fund than if the Fund were not leveraged. Changes in interest rates and related economic factors could cause the relationship between the cost of leverage and the yield to change, so that rates involved in the leveraging arrangement may substantially increase relative to the yield on the obligations in which the proceeds of the leveraging have been invested. To the extent that the interest expense involved in leveraging approaches the net return on the Fund’s investment portfolio, the benefit of leveraging will be reduced, and if the interest expense incurred as a result of leveraging were to exceed the net return to investors, the Fund’s use of leverage would result in a lower rate of return than if the Fund were not leveraged. If the Fund’s current investment income was not sufficient to meet the interest expense of leveraging, it could be necessary for the Fund to liquidate some of its investments at an inappropriate time.

I. Concentration

The Fund is not concentrated and, therefore, does not invest more than 25% of its assets in any one industry. For purposes of this limitation, there is no limit on: (1) investments in U.S. Government Securities, in repurchase agreements covering U.S. Government Securities, in tax-exempt securities issued by the states, territories or possessions of the United States (“municipal securities”) or in foreign government securities; or (2) investments in issuers domiciled in a single jurisdiction.

J. Investment Company Securities and Exchange Traded Products

General. The Fund may invest in other open-end and closed-end investment companies consistent with the Fund's investment objectives and strategies. The Fund may also invest in money market mutual funds, pending investment of cash balances. The Fund will limit its investment in the securities of other open-end and closed-end investment companies to the extent permitted by the 1940 Act and the rules promulgated thereunder.

Under Section 12(d)(1)(A) of the 1940 Act, the Fund's investments in such securities are generally limited to 3% of the outstanding voting stock of any one company, 5% of the Fund's total assets in any one company, and 10% of the Fund's total assets in investment companies generally. Under certain circumstances, the Fund may invest its assets in accordance with Section 12(d)(1)(F) of the 1940 Act and, thereby, invest more than 5% of its total assets in another investment company or 10% of its total assets invested among multiple investment companies. The Fund's investments in other investment companies may include money market mutual funds, which are not subject to the percentage limitations set forth above. Shares of an exchange-traded fund ("ETF") that has received exemptive relief from the SEC to permit other funds to invest in the shares without these limitations may also be excluded from such restrictions.

The Fund may invest in ETFs (which may, in turn, invest in equities, bonds, and other financial vehicles). ETFs are investment companies, trusts, or partnerships whose shares are bought and sold on a securities exchange. An index ETF typically holds a portfolio of securities designed to track a particular market segment or index while other ETFs are actively managed. The Fund could purchase an ETF to gain exposure to a portion of the U.S. or foreign market or for the purpose of hedging its investments.

The Fund may also invest in exchange traded notes ("ETNs"), which are similar to index ETFs in that they may be designed to provide returns that track an index. ETNs are different from ETFs, however, in one important respect. They are not secured by an underlying pool of assets, but rather are notes (or debt securities) secured only by the ability of the issuer to pay. Further, as debt securities of an issuer, ETN shares are subject to the same risks described for "Corporate Debt Obligations" above.

The Fund may invest also in other Exchange Traded Products ("ETPs") that, like an ETF, invest in a pool of assets and are traded on an exchange. ETPs, however, are generally organized as commodity pools registered under the Commodity Exchange Act or as grantor trusts and are not registered as investment companies under the 1940 Act. This is due to the fact that they invest in, for example, commodities or currencies rather than securities.

Risk. The Fund, as a shareholder of another investment company, ETF, or ETP, will bear its pro-rata portion of the other investment company, ETF, or ETP's fees and expenses in addition to its own fees and expenses. In addition, it will be exposed to the investment risks associated with the other investment company, ETF, or ETP which generally reflect the risks of the other investment company's underlying securities. To the extent that the Fund invests in open-end or closed-end companies that invest primarily in the securities of companies located outside the U.S., see the risks related to foreign securities set forth in the section entitled "Investment Policies and Risks – Foreign Securities" above.

As a shareholder, the Fund must rely on the other investment company, ETF, or ETP to achieve its investment objective. If the other investment company, ETF, or ETP fails to achieve its investment objective, the value of the Fund's investment will decline, adversely affecting the Fund's performance.

Because ETFs are investment companies, owning an ETF generally entails the same risks of owning investment company securities. Investments in ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund, and a lack of liquidity in an ETF could result in its market price being more volatile than the ETF's underlying portfolio of securities. In addition, because ETFs are listed and traded like stocks listed on a national stock exchange, ETF shares potentially may trade at a discount or a premium to the ETF's NAV. ETFs are subject to the risk that trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. Finally, because the value of ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the optimal time, adversely affecting the Fund's performance. Further, as debt securities of an issuer, ETN shares are subject to the same risks described for "Corporate Debt Obligations" above.

K. Temporary Defensive Position and Cash Investments

The Fund may assume a temporary defensive position and may invest without limit in money market instruments that are of high quality. High quality money market instruments are those that are rated in one of the two highest short-term rating

categories or, if not rated, determined by the Adviser to be of comparable quality. The Fund also may invest in cash and high quality money market instruments pending investment of cash balances. The Fund may hold large amounts of cash and cash equivalents with the Fund's custodian for cash management purposes, which may result in cash balances exceeding the Federal Deposit Insurance Corporation insurance limits.

Money market instruments usually have maturities of one year or less and fixed rates of return. The money market instruments in which the Fund may invest include short-term U.S. Government Securities, commercial paper, bankers' acceptances, certificates of deposit, interest-bearing savings deposits of commercial banks, repurchase agreements on securities in which the Fund may invest and registered and unregistered money market funds.

L. Master-Feeder

The Fund may seek to achieve its investment objective by converting to a master-feeder structure. A fund operating under a master-feeder structure holds, as its only investment, shares of another investment company having substantially the same investment objective and policies. The Board will not authorize conversion to a master-feeder structure if it would materially increase costs to Fund shareholders. The Board will not convert the Fund to a master-feeder structure without notice to the shareholders.

M. Cybersecurity Risk

The Fund, and its service providers, may be prone to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or its third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund's service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by its service providers or any other third parties whose operations may affect a Fund or its shareholders. Similar types of cyber security risks are also present for issues or securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value.

INVESTMENT LIMITATIONS

The Trust, on behalf of the Fund, has adopted the following investment policies which are fundamental policies that may not be changed without the affirmative vote of a majority of the outstanding voting securities of the Fund. "A majority of the outstanding voting securities of the Fund," as defined by the 1940 Act, means the affirmative vote of the lesser of (1) more than 50% of the outstanding shares of the Fund, or (2) 67% or more of the shares present at a meeting, if more than 50% of the outstanding shares are represented at the meeting in person or by proxy.

The Fund's investment objective is a non-fundamental policy. Non-fundamental policies may be changed by the Board without shareholder approval.

For purposes of the Fund's investment limitations, all percentage limitations apply immediately after an investment. Except with respect to the fundamental policy relating to borrowing money, set forth in (1) below, if a percentage limitation is adhered to at the time of an investment, a later increase or decrease in the percentage resulting from any change in value or net assets will not result in a violation of such restrictions. If at any time the Fund's borrowings exceed its limitations due to a decline in net assets, such borrowings will be reduced within three days (excluding Sundays and holidays) to the extent necessary to comply with the limitation.

Fundamental Limitations. The Fund has adopted the following investment limitations that cannot be changed by the Board without shareholder approval.

1. The Fund may not borrow money, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
2. The Fund may not issue senior securities, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
3. The Fund may not make loans, except to the extent permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
4. The Fund may not engage in the business of underwriting securities except to the extent that the Fund may be considered an underwriter within the meaning of the 1933 Act in the acquisition, disposition or resale of its portfolio securities or in connection with investments in other investment companies, or to the extent otherwise permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
5. The Fund may not purchase or sell real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
6. The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities or from investing in companies, which are engaged in commodities business or have a significant portion of their assets in commodities.
7. The Fund will not invest more than 25% of its total assets in a particular industry. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

With respect to the fundamental policy relating to borrowing money set forth in (1) above, the 1940 Act permits the Fund to borrow money in amounts of up to one-third of the Fund's total assets, at the time of borrowing, from banks for any purpose (the Fund's total assets include the amounts being borrowed). To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings (not including borrowings for temporary purposes in an amount not exceeding 5% of the value of the Fund's total assets). In the event that such asset coverage falls below this percentage, the Fund is required to reduce the amount of its borrowings within three days (not including Sundays and holidays) so that the asset coverage is restored to at least 300%. Asset coverage means the ratio that the value of the Fund's total assets (including amounts borrowed), minus liabilities other than borrowings, bears to the aggregate amount of all borrowings.

With respect to the fundamental policy relating to issuing senior securities set forth in (2) above, "senior securities" are defined as Fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of Fund assets. The 1940 Act prohibits the Fund from issuing any class of senior securities or selling any senior

securities of which it is the issuer, except that the Fund is permitted to borrow from a bank if consistent with the fundamental policy set forth in (1) above. The policy in (2) above will be interpreted not to prevent collateral arrangements with respect to options on securities. The Fund will segregate liquid assets with respect to certain leveraged positions in accordance with requirements under Section 18 of the 1940 Act and current applicable SEC staff interpretations.

With respect to the fundamental policy relating to making loans set forth in (3) above, the 1940 Act does not prohibit the Fund from making loans; however, SEC staff interpretations currently prohibit registered investment companies from lending more than one-third of their total assets, except through the purchase of debt obligations.

With respect to the fundamental policy relating to investing in real estate set forth in (5) above, the Fund may, to the extent permitted by applicable law, invest in securities or other instruments directly or indirectly secured by real estate and invest in securities or other instruments issued by issuers that invest in real estate. Investments in securities of issuers that are exposed to or invested in the real estate business will not be deemed to be a purchase or sale of real estate.

A. Board of Trustees

The Trust is governed by its Board of Trustees. The Board oversees the management and operations of the Trust and the Fund, in accordance with federal law, Delaware law and the stated policies of the Fund. The Board oversees the Trust's officers and service providers, including the Adviser, which is responsible for the management of the day-to-day operations of the Fund based on policies and agreements reviewed and approved by the Board. In carrying out these responsibilities, the Board regularly interacts with and receives reports from senior personnel of service providers and the Trust's Chief Compliance Officer ("CCO"). The Board also is assisted by the Trust's independent auditor (which reports directly to the Trust's Audit Committee), independent counsel and other experts as appropriate. The Trustees serve until their respective successors have been elected and qualified or until their earlier death, resignation or removal.

The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series. As a result, the term "Fund Complex" applies only to the Fund.

Board Structure and Related Matters. Independent Trustees constitute at least a majority of the Board members. As of January 1, 2018, four of the Trust's Trustees retired and were replaced by four new Trustees, who were previously elected by shareholders. An existing Independent Trustee serves as Independent Chair of the Board. The Independent Chair's responsibilities include: setting an agenda for each meeting of the Board; presiding at all meetings of the Board and Independent Trustees; and serving as a liaison with other Trustees, the Trust's officers, other management personnel and counsel to the Fund. The Independent Chair also performs such other duties as the Board may from time to time determine.

The Trustees discharge their responsibilities collectively as a Board, as well as through Board committees, each of which operates pursuant to a charter or procedures approved by the Board that delineates the specific responsibilities of that committee. The Board has established three standing committees: the Audit Committee, the Nominating Committee and the Qualified Legal Compliance Committee. The members and responsibilities of each Board committee are summarized below.

The Board periodically evaluates its structure and composition as well as various aspects of its operations. The Board believes that its leadership structure, including its Independent Chair position and its committees, is appropriate for the Trust in light of, among other factors, the asset size and nature of the Fund, the number of funds overseen by the Board, the arrangements for the conduct of the Fund's operations, the number of Trustees and the Board's responsibilities. On an annual basis, the Board conducts a self-evaluation that considers, among other matters, whether the Board and its committees are functioning effectively and whether, given the size and composition of the Board and each of its committees, the Trustees are able to oversee effectively the number of funds.

The Board holds four regularly scheduled in-person meetings each year. The Board may hold special meetings, as needed, either in person or by telephone, to address matters arising between regular meetings. At least once per quarter, during a regularly scheduled in-person meeting of the Board, the Independent Trustees meet without the presence of interested Trustees.

The Trustees are identified in the table below, which provides information as to their principal business occupations held during the last five years and certain other information. Each Trustee serves until his or her death, resignation or removal and replacement. The address for all Trustees is c/o Atlantic Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101. John Y. Keffer, a former Trustee of the Trust, has been appointed as a Trustee Emeritus by the Board. As Trustee Emeritus, Mr. Keffer will not have a vote with respect to Trust matters; however, Mr. Keffer may attend Board meetings.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Series in Fund Complex Overseen By Trustee	Other Directorships Held By Trustee During Past Five Years
Independent Trustees					
David Tucker Born: 1958	Trustee; Chairman of the Board	Since 2011 and Chairman since 2018	Director, Blue Sky Experience (a charitable endeavor) since 2008; Senior Vice President & General Counsel, American Century Companies (an investment management firm) 1998-2008.	1	Trustee, Forum Funds II, Forum ETF Trust and U.S. Global Investors Funds
Mark D. Moyer Born: 1959	Trustee	Since 2018	Chief Financial Officer, Freedom House (a NGO advocating political freedom and democracy) since 2017; independent consultant providing interim CFO services, principally to non-profit organizations, 2011-2017; Chief Financial Officer, Institute of International Education (a NGO administering international educational exchange programs), 2008-2011; Chief Financial Officer and Chief Restructuring Officer, Ziff Davis Media Inc. (an integrated media company), 2005-2008; Adjunct Professor of Accounting, Fairfield University from 2009-2012.	1	Trustee, Forum Funds II, Forum ETF Trust and U.S. Global Investors Funds
Jennifer Brown-Strabley Born: 1964	Trustee	Since 2018	Principal, Portland Global Advisors, 1996-2010.	1	Trustee, Forum Funds II, Forum ETF Trust and U.S. Global Investors Funds
Interested Trustees⁽¹⁾					
Stacey E. Hong Born: 1966	Trustee	Since 2018	President, Atlantic since 2008.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Jessica Chase Born: 1970	Trustee	Since 2018	Senior Vice President, Atlantic since 2008.	1	None

¹ Stacey E. Hong is currently treated as an interested person of the Trust, as defined in the 1940 Act, due to his affiliation with Atlantic. Jessica Chase is currently an interested person of the Trust, as defined in the 1940 Act, due to her affiliation with Atlantic and her role as President of the Trust.

In addition to the information set forth in the table above, each Trustee possesses other relevant qualifications, experience, attributes or skills. The following provides additional information about these qualifications and experience.

David Tucker: Mr. Tucker has extensive experience in the investment management industry, including experience in senior management, legal and compliance roles at two large mutual fund complexes; service on various committees of the Investment Company Institute (“ICI”); and director of ICI Mutual (a mutual insurance company sponsored by the investment

company industry), including service as chairman of the underwriting, risk and fraud committees of ICI Mutual's board of directors. Mr. Tucker actively serves charitable organizations in the metropolitan Kansas City area.

Mark D. Moyer: Mr. Moyer has extensive experience with finance. He currently serves as chief financial officer for a non-governmental organization and has served as chief financial officer for an integrated media company and a not-for-profit organization. Mr. Moyer also served as an adjunct professor of accounting at Fairfield University.

Jennifer Brown-Strabley: Ms. Brown-Strabley has extensive experience in the financial services and investment management industry, including experience in fixed-income sales and quantitative research for hedge funds and as a principal of a registered investment adviser.

Stacey E. Hong: Mr. Hong has experience in auditing as a certified public accountant and in the financial services industry as the president of a fund service provider specializing in administration, accounting, and transfer agency services for pooled investment products. Mr. Hong has served as a principal executive officer and as a principal financial officer for certain investment companies.

Jessica Chase: Ms. Chase has extensive experience in the fund services industry, including senior management roles overseeing the mutual fund and hedge fund accounting operations for a large bank provider and business development for a fund service provider specializing in third-party mutual fund administration. Ms. Chase serves as principal executive officer for certain investment companies.

Risk Oversight. Consistent with its responsibility for oversight of the Trust and the Fund, the Board oversees the management of risks relating to the administration and operation of the Trust and the Fund. The Adviser, as part of its responsibilities for the day-to-day operations of the Fund, is responsible for day-to-day risk management. The Board, in the exercise of its reasonable business judgment, also separately considers potential risks that may impact the Fund. The Board performs this risk management oversight directly and, as to certain matters, through its committees (described below) and through the Independent Trustees. The following provides an overview of the principal, but not all, aspects of the Board's oversight of risk management for the Trust and the Fund.

In general, the Fund's risks include, among others, investment risk, valuation risk, compliance risk and operational risk. The Board has adopted, and periodically reviews, policies and procedures designed to address these and other risks to the Trust and the Fund. In addition, under the general oversight of the Board, the Adviser and other service providers have themselves adopted a variety of policies, procedures and controls designed to address particular risks. Different processes, procedures and controls are employed with respect to different types of risks. Further, the Adviser oversees and regularly monitors the investments, operations and compliance of the Fund's investments.

The Board also oversees risk management for the Trust and the Fund through review of regular reports, presentations and other information from officers of the Trust and other persons. Senior officers of the Trust, senior officers of the Adviser and the CCO regularly report to the Board on a range of matters, including those relating to risk management. In this regard, the Board periodically receives reports regarding other service providers to the Trust, either directly or through the CCO. On at least a quarterly basis, the Independent Trustees meet with the CCO to discuss matters relating to the Fund's compliance program. Further, at least annually, the Board receives a report from the CCO regarding the effectiveness of the Fund's compliance program.

The Board receives regular reports from a Valuation Committee, composed of the Principal Executive Officer, the Principal Financial Officer, the CCO, a senior fund accounting member, a senior representative from the Administrator's regulatory administration group and a representative of the Adviser. The Valuation Committee operates pursuant to the Trust's Valuation and Error Correction Policy (the "Valuation Policy"), as approved by the Board. The Valuation Committee reports to the Board on the pricing of the Fund's shares and the valuation of the Fund's portfolio securities; recommends, subject to approval by the Board, independent pricing services to provide a value for Fund assets; makes and monitors fair value determinations pursuant to the Valuation Policy; and carries out any other functions delegated to it by the Board relating to the valuation of Fund assets.

The Board also regularly receives reports from the Adviser with respect to the investments and securities trading of the Fund. For example, typically, the Board receives reports, presentations and other information from the Adviser on at least an annual basis in connection with the Board's consideration of the renewal of the investment advisory agreement between the Adviser and the Trust on behalf of the Fund (the "Advisory Agreement"). Also, if applicable, the Board receives reports from the Adviser and other service providers in connection with the Board's consideration of the renewal of any distribution plan of the Fund under Rule 12b-1 under the 1940 Act. Senior officers of the Trust and senior officers of the Adviser also

report regularly to the Audit Committee on valuation matters, internal controls and accounting and financial reporting policies and practices. In addition, the Audit Committee receives regular reports from the Trust's independent auditors on internal control and financial reporting matters.

Trustee Ownership in the Fund and the Fund Complex. The following table sets forth each Trustee's ownership of the Fund and the Fund Complex.

Trustees	Dollar Range of Beneficial Ownership in the Fund as of December 31, 2017	Aggregate Dollar Range of Ownership as of December 31, 2017 in all Registered Investment Companies Overseen by Trustee in the Fund Complex
Independent Trustees		
David Tucker	None	None
Mark D. Moyer	None	None
Jennifer Brown-Strabley	None	None
Interested Trustee		
Stacey E. Hong	None	None
Jessica Chase	None	None

B. Principal Officers of the Trust

The officers of the Trust conduct and supervise its daily business. As of the date of this SAI, the officers of the Trust, their years of birth and their principal occupations during the past five calendar years are as set forth below. Each officer serves until his or her death, resignation or removal and replacement. The business address of each officer is c/o Atlantic Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past 5 Years
Jessica Chase Born: 1970	President; Principal Executive Officer	Since 2015	Senior Vice President, Atlantic since 2008.
Karen Shaw Born: 1972	Treasurer; Principal Financial Officer	Since 2008	Senior Vice President, Atlantic since 2008.
Zachary Tackett Born: 1988	Vice President; Secretary and Anti-Money Laundering Compliance Officer	Since 2014	Counsel, Atlantic since 2014; Intern Associate, Coakley & Hyde, PLLC, 2010-2013.
Michael J. McKeen Born: 1971	Vice President	Since 2009	Senior Vice President, Atlantic since 2008.
Timothy Bowden Born: 1969	Vice President	Since 2009	Manager, Atlantic since 2008.
Geoffrey Ney Born: 1975	Vice President	Since 2013	Manager, Atlantic since 2013; Senior Fund Accountant, Atlantic, 2008-2013.
Todd Proulx Born: 1978	Vice President	Since 2013	Manager, Atlantic since 2013; Senior Fund Accountant, Atlantic, 2008-2013.
Carlyn Edgar Born: 1963	Vice President	Since 2008	Senior Vice President, Atlantic since 2008; Chief Compliance Officer, 2008-2016.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past 5 Years
Dennis Mason Born: 1967	Chief Compliance Officer	Since 2016	Fund Compliance Officer, Atlantic since 2013; Senior Specialist, Atlantic, 2011-2013; Senior Analyst, Atlantic, 2008-2011.

C. Ownership of Securities of the Adviser and Related Companies

As of December 31, 2017, no Independent Trustee (or any of his or her immediate family members) owned beneficially or of record, securities of any Trust investment adviser, the Trust’s principal underwriter, or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with any Trust investment adviser or principal underwriter.

D. Information Concerning Trust Committees

Audit Committee. The Trust’s Audit Committee, which typically meets at least quarterly, consists of Messrs. Tucker, Moyer, and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Audit Committee assists the Board in fulfilling its responsibility for oversight of the quality and integrity of the accounting, auditing and financial reporting practices of the Trust. It is directly responsible for the appointment, termination, compensation and oversight of work of the independent auditors to the Trust. In so doing, the Audit Committee reviews the methods, scope and results of the audits and audit fees charged, and reviews the Trust’s internal accounting procedures and controls. During the fiscal year ended April 30, 2018, the Audit Committee met five times.

Nominating Committee. The Trust’s Nominating Committee, which meets when necessary, consists of Messrs. Tucker, Moyer, and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Nominating Committee is charged with the duty of nominating all Trustees and committee members and presenting these nominations to the Board. The Nominating Committee will not consider any nominees for Trustee recommended by security holders. During the fiscal year ended April 30, 2018, the Nominating Committee met two times.

Qualified Legal Compliance Committee. The Qualified Legal Compliance Committee (the “QLCC”), which meets when necessary, consists of Messrs. Tucker, Moyer, and Ms. Brown-Strabley, constituting all of the Independent Trustees. The QLCC evaluates and recommends resolutions to reports from attorneys servicing the Trust regarding evidence of material violations of applicable federal and state law or the breach of fiduciary duties under applicable federal and state law by the Trust or an employee or agent of the Trust. During the fiscal year ended April 30, 2018, the QLCC did not meet.

E. Compensation of Trustees and Officers

Effective January 1, 2018, each Trustee is paid an annual fee of \$31,000 for service to the Trust. The Chairman of the Board is paid an annual fee of \$41,000. The Chairman of the Audit Committee is paid an additional fee of \$2,000 annually. The Trustees and Chairman may receive additional fees for special Board meetings. Each Trustee is also reimbursed for all reasonable out-of-pocket expenses incurred in connection with his or her duties as a Trustee, including travel and related expenses incurred in attending Board meetings. No officer of the Trust is compensated by the Trust, but officers are reimbursed for travel and related expenses incurred in attending Board meetings held outside of Portland, Maine.

The following table sets forth the fees paid to each Trustee by the Fund and the Fund Complex for the fiscal year ended April 30, 2018.

Trustee	Aggregate Compensation from the Fund	Pension or Retirement Benefits Accrued as part of Fund Expenses	Total Compensation from Fund Complex
Independent Trustees			
David Tucker	\$1,322	N/A	\$1,322
Mark D. Moyer	\$434	N/A	\$434
Jennifer Brown-Strabley	\$408	N/A	\$408
Interested Trustee			
Stacey E. Hong	\$0	N/A	\$0
Jessica Chase	\$0	N/A	\$0

F. Investment Adviser

Services of Adviser. The Adviser serves as investment adviser to the Fund pursuant to the Advisory Agreement. Under the Advisory Agreement, the Adviser furnishes, at its own expense, all services, facilities, and personnel necessary in connection with managing the Fund’s investments and effecting portfolio transactions for the Fund. The Adviser may compensate brokers or other service providers (“Financial Intermediaries”) out of its own assets, and not as additional charges to the Fund, in connection with the sale and distribution of shares of the Fund and/or servicing of these shares.

Ownership of Adviser. Monongahela Capital Management is a wholly-owned subsidiary of Rodgers Brothers, Inc.

Information Concerning Accounts Managed by Portfolio Managers. The following table provides information regarding other accounts managed by the portfolio managers as of April 30, 2018:

Name of Portfolio Manager	Number of Other Accounts Managed and Assets by Account Type			Number of Accounts and Assets for Which Advisory Fee is Performance-Based		
	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts
Mark Rodgers	None	None	659 accounts \$430 million	None	None	None
Michael C. Rodgers	None	None	659 accounts \$430 million	None	None	None

Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with the following conflicts:

- The management of multiple client accounts may result in a portfolio manager devoting unequal time and attention to the management of the Fund. The Adviser may seek to manage such competing interests for the time and attention of the portfolio managers by having the portfolio managers focus on a particular investment discipline.
- If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one account, the Fund may be unable to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible accounts. To deal with these situations, the Adviser has adopted procedures for allocating portfolio transactions across multiple accounts.
- With respect to securities transactions for the Fund, the Adviser determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as other pooled investment vehicles that are not registered mutual funds and other accounts managed for organizations and individuals), the Adviser may be limited by the client

with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, the Adviser may place separate, non-simultaneous transactions for the Fund and another account which may temporarily affect the market price of the security or the execution of the transaction, or both, to the detriment of the Fund or the other account.

- Finally, the appearance of a conflict of interest may arise if the Adviser has an incentive, such as a performance-based management fee, which relates to the management of one fund or account but not all funds and accounts with respect to which a portfolio manager has day-to-day management responsibilities.

The Adviser has adopted certain compliance procedures, which are designed to address these types of conflicts. The Adviser has developed and implemented policies and procedures designed to ensure that all clients are treated equitably. In addition, compliance oversight and monitoring ensures adherence to policies designed to avoid conflicts. The Adviser’s policies and procedures address trade aggregation and allocation. Typically when aggregating trades across funds and/or other accounts, the size of the trade for each fund and/or other account is determined by proportional size of the fund and/or other account. Moreover, in aggregated trades each fund and/or other account receives the average share price and transaction costs are shared on a pro-rata basis. Additionally, given the nature of the Adviser’s investment process and its Fund and/or other accounts, the Adviser’s investment management team services are typically applied collectively to the management of all the Funds and/or other accounts following the same strategy.

Compensation of the Adviser’s portfolio management team is not based upon performance of the Fund managed by the Adviser. Fund performance is not a factor in compensation as it might encourage investment decisions deviating from the Fund’s mandate. To mitigate the potential for conflict to have a team member favor one Fund over another Fund and/or other account, the Adviser has established procedures, including policies to monitor trading and best execution for all funds and/or other accounts.

There is no guarantee that such procedures will detect each and every situation in which a conflict arises.

Information Concerning Compensation of Portfolio Managers. The portfolio managers receive a salary from the Fund’s Adviser.

Portfolio Manager Ownership in the Fund. The Adviser has provided the following information regarding each portfolio manager’s ownership in the Fund:

Portfolio Manager	Dollar Range of Beneficial Ownership in the Fund as of April 30, 2018
Mark Rodgers	\$100,001 - \$500,000
Michael C. Rodgers	Over \$1,000,000

Fees. The Adviser receives an advisory fee from the Fund at an annual rate equal to 0.75% of the Fund’s average annual daily net assets under the terms of the Advisory Agreement. The Adviser has contractually agreed to waive its fee and/or reimburse Fund expenses to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding all taxes, interest, portfolio transaction expenses, dividend and interest expenses on short sales, acquired fund fees and expenses, proxy expenses and extraordinary expenses) to 0.85% through at least September 1, 2019 (“Expense Cap”). The Expense Cap may only be raised or eliminated with the consent of the Board of Trustees. Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement will increase if exclusions from the Expense Cap apply.

The advisory fee, if not waived, is accrued daily and paid monthly by the Fund and is assessed based on the daily net assets of the Fund. In addition to receiving its advisory fee from the Fund, the Adviser may also act and be compensated as investment manager for its clients with respect to assets that such clients have invested in the Fund. If you have a separately managed account with the Adviser with assets invested in the Fund, the Adviser will not assess or receive any management fee on the portion of the separately managed account invested in the Fund.

Table 1 in Appendix B shows the dollar amount of advisory fees accrued by the Fund, the amount of advisory fees waived and/or expenses reimbursed by the Adviser, if any, and the actual advisory fees retained by the Adviser. The data provided is for the last three fiscal years.

Advisory Agreement. The Fund’s Advisory Agreement remains in effect for an initial period of two years from the date of its effectiveness, and thereafter the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party (other than as Trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to the Fund on 60 days’ written notice when authorized either by vote of the Fund’s shareholders or by a majority vote of the Board, or by the Adviser on 60 days’ written notice to the Trust. The Advisory Agreement terminates immediately upon assignment.

Under the Advisory Agreement, the Adviser is not liable for any mistake of judgment, mistake of law, or act or omission, except for willful misfeasance, bad faith, or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Advisory Agreement.

G. Distributor

Distribution Services. Foreside Fund Services, LLC (the “Distributor”) is the distributor (also known as principal underwriter) of the shares of the Fund and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Adviser or any other service provider for the Trust.

Under a Distribution Agreement with the Trust, the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enters into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to investors by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not the investors, will be the shareholder of record, although investors may have the right to vote shares depending upon their arrangement with the intermediary. The Fund does not have a distribution (12b-1) plan; accordingly, the Distributor does not receive compensation from the Fund for its distribution (12b-1) services. The Adviser pays the Distributor a fee from the Adviser’s own resources for certain distribution-related services.

H. Other Fund Service Providers

Administrator, Fund Accountant, Transfer Agent, and Compliance Services. Atlantic and its subsidiaries provide administration, compliance, fund accounting and transfer agency services to the Fund. Atlantic is a subsidiary of Forum Holdings Corp I. John Y. Keffer, a Trustee Emeritus, is the Chairman of Atlantic and is also the founder and owner of Forum Holdings Corp. I, the parent entity of Atlantic.

Pursuant to the Atlantic Services Agreement (the “Services Agreement”), the Fund pays Atlantic a bundled fee for administration, compliance, fund accounting and transfer agency services. The Fund also pays Atlantic certain surcharges and shareholder account fees. The fee is accrued daily by the Fund and is paid monthly based on the average net assets, transactions and positions for the prior month.

The Services Agreement continues in effect until terminated, so long as its continuance is specifically approved or ratified with such frequency and in such manner as required by applicable law. After an initial three-year term, the Services Agreement is terminable with or without cause and without penalty by the Trust or by Atlantic on 120 days’ written notice to the other party. The Services Agreement is also terminable for cause by the non-breaching party on at least 60 days’

written notice to the other party, provided that such party has not cured the breach within that notice period. Under the Services Agreement, Atlantic is not liable to the Fund or the Fund's shareholders for any act or omission, except for willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Services Agreement. The Services Agreement also provides that Atlantic will not be liable to a shareholder for any loss incurred due to a NAV difference if such difference is less than or equal to 0.5% or less than or equal to \$25.00 per shareholder account, and in addition, limits the amount of any loss for which Atlantic would be liable. Also, Atlantic is not liable for the errors and omissions of others, including the entities that supply security prices to Atlantic and the Fund. Losses incurred by the Fund as a result of acts or omissions by Atlantic or any other service provider for which Atlantic or the service provider is not liable to the Fund would be borne through the Fund, by its shareholders.

As Administrator, Atlantic administers the Fund's operations except those that are the responsibility of any other service provider hired by the Trust, all in such manner and to such extent as may be authorized by the Board. The Administrator's responsibilities include, but are not limited to: (1) overseeing the performance of administrative and professional services rendered to the Fund by others, including its custodian, transfer agent and dividend disbursing agent as well as legal, auditing, shareholder servicing and other services performed for the Fund; (2) preparing for filing and filing certain regulatory filings (*i.e.*, registration statements and shareholder reports) subject to Trust counsel and/or independent auditor oversight; (3) overseeing the preparation and filing of the Fund's tax returns, the preparation of financial statements and related reports to the Fund's shareholders, the SEC and state and other securities administrators; (4) providing the Fund with adequate general office space and facilities and providing persons suitable to the Board to serve as officers of the Trust; (5) assisting the Adviser in monitoring Fund holdings for compliance with prospectus investment restrictions and assisting in preparation of periodic compliance reports; and (6) with the cooperation of the Adviser, the officers of the Trust and other relevant parties, preparing and disseminating materials for meetings of the Board.

Atlantic provides a Principal Executive Officer, a Principal Financial Officer, a CCO, and an Anti-Money Laundering Compliance Officer to the Fund, as well as certain additional compliance support functions.

Atlantic Shareholder Services, LLC, 3 Canal Plaza, Portland, Maine 04101 (the "Transfer Agent"), a wholly-owned subsidiary of Atlantic, serves as transfer agent and distribution paying agent for the Fund. The Transfer Agent is registered as a transfer agent with the SEC. The Transfer Agent maintains an account for each shareholder of record of the Fund and is responsible for processing purchase and redemption requests and paying distributions to shareholders of record.

As Fund accountant, Atlantic provides fund accounting services to the Fund. These services include calculating the NAV of the Fund.

Table 2 in Appendix B shows the dollar amount of the fees accrued by the Fund for administration services, the amount of fees waived by Atlantic, if any, and the actual fees retained by Atlantic under the Services Agreement. The data provided is for the last three fiscal years.

Custodian. MUFG Union Bank, N.A. (formerly, Union Bank, N.A.) (the "Custodian") is the custodian for the Fund. The Custodian safeguards and controls the Fund's cash and securities, determines income and collects interest on Fund investments. The Custodian may employ subcustodians to provide custody of the Fund's domestic and foreign assets. The Custodian also maintains certain books and records of the Fund that are required by applicable federal regulations. The Custodian is located at 350 California Street, 6th Floor, San Francisco, California 94104.

Legal Counsel. K&L Gates LLP, 1601 K Street, N.W., Washington, D.C. 20006, serves as legal counsel to the Trust.

Independent Registered Public Accounting Firm. BBD, LLP ("BBD"), 1835 Market Street, 3rd Floor, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund, providing audit and tax services. BBD audits the annual financial statements of the Fund and provides the Fund with an audit opinion. BBD also reviews certain regulatory filings of the Fund.

PORTFOLIO TRANSACTIONS

A. How Securities are Purchased and Sold

Purchases and sales of portfolio securities that are fixed-income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from which the Fund purchases or to which the Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There usually are no brokerage commissions paid for these securities.

Purchases and sales of portfolio securities that are equity securities (for instance, common stock and preferred stock) are generally effected if: (1) the security is traded on an exchange, through brokers that charge commissions; and (2) the security is traded in the over-the-counter markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated.

When transactions are executed in an over-the-counter market, the Adviser will seek to deal with the primary market makers, but when necessary in order to obtain best execution, the Adviser will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflect the spread between the bid and asked price.

In the case of fixed-income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission, markup or markdown.

B. Commissions Paid

Table 3 in Appendix B shows the dollar amount of the aggregate brokerage commissions paid by the Fund; the amount of commissions paid to an affiliate of the Fund, the Adviser or the Distributor; the percentage of brokerage commissions paid to an affiliate of the Fund, the Adviser or the Distributor; and the percentage of transactions executed by an affiliate of the Fund, the Adviser or the Distributor. The data provided is for the last three fiscal years.

C. Adviser Responsibility for Purchases and Sales and Choosing Broker-Dealers

The Adviser places orders for the purchase and sale of securities with broker-dealers selected by and at the discretion of the Adviser. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of the Fund rather than by any formula.

The Adviser seeks “best execution” for all portfolio transactions. This means that the Adviser seeks the most favorable price and execution available. The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Adviser takes into account factors such as the size of the order, the difficulty of execution, the efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker-dealer. The Fund may pay a higher commission if, for example, the broker-dealer has specific expertise in a particular type of transaction (due to factors such as size or difficulty) or is highly efficient in trade execution.

The Adviser may also give consideration to brokerage and research services furnished to the Adviser by broker-dealers and may cause the Fund to pay these broker-dealers a higher commission or spread than may be charged by other broker-dealers. Research services may include reports that are common in the industry, such as research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the Adviser uses the research to manage all client accounts. Therefore, the commission dollars spent for research generally benefit all of the Adviser’s clients and the Fund’s investors, although a particular client may not benefit from research received on each occasion. The Adviser does not reduce its fees because the Adviser receives research.

D. Counterparty Risk

The Adviser monitors the creditworthiness of counterparties to the Fund’s transactions and intends to enter into a transaction only when it believes that the counterparty presents appropriate credit risks.

E. Transactions through Affiliates

The Adviser may effect brokerage transactions through affiliates of the Adviser (or affiliates of those persons) pursuant to procedures adopted by the Trust and in accordance with applicable law. The Adviser is affiliated with a registered broker-dealer, Rodgers Bros., Inc. (“RBI”). The Fund generally will not transact through RBI. To the extent the Fund does transact through RBI in connection with its brokerage transactions, all transactions will proceed on an agency basis subject to compliance with the policies and procedures of the Trust applicable to agency transactions by the Fund with affiliated broker-dealers. The Fund will not engage in principal transactions with any affiliated broker-dealer, including RBI.

F. Other Accounts of the Adviser

Investment decisions for the Fund are made independently from those for any other account or investment company that is or may in the future become advised by the Adviser or its affiliates. Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. In some instances, with any required consent, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security, in which event each day’s transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Adviser’s opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Adviser occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales.

G. Portfolio Turnover

The frequency of portfolio transactions of the Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, the Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. Higher portfolio turnover rates may result in increased brokerage costs to the Fund and a possible increase in short-term capital gains (taxable to shareholders as ordinary income when distributed to them) or losses. An annual portfolio turnover rate of 100% would occur if all the securities in the Fund were replaced once in a period of one year.

Portfolio turnover rate is defined under the rules of the SEC as the value of the securities purchased or securities sold, excluding all securities whose maturities at time of acquisition were one year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one year, including options in which the Fund invests, are excluded from the calculation of portfolio turnover rate.

H. Securities of Regular Broker-Dealers

From time to time the Fund may acquire and hold securities issued by its “regular brokers and dealers” or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the ten brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund’s last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund’s last fiscal year; or (3) sold the largest amount of the Fund’s shares during the Fund’s last fiscal year.

Table 4 in Appendix B lists the regular brokers and dealers of the Fund whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund’s holdings of those securities as of the Fund’s most recent fiscal year ended April 30, 2018.

I. Portfolio Holdings

Portfolio holdings as of the end of the Fund’s annual and semi-annual fiscal periods are reported to the SEC on Form N-CSR within 10 days of the mailing of the annual or semi-annual report (typically no later than 70 days after the end of each period). Portfolio holdings as of the end of the first and third fiscal quarters are reported to the SEC on Form N-Q within 60 days after the end of such period. You may request a copy of the Fund’s latest annual or semi-annual report to shareholders or a copy of the Fund’s latest Form N-Q, when it is available, which contains the Fund’s portfolio holdings, by contacting the Transfer Agent at the address or phone number listed on the cover of this SAI. You may also obtain a copy of the Fund’s latest Form N-CSR and Form N-Q by accessing the SEC’s website at www.sec.gov.

In addition, the Adviser may make publicly available, on a quarterly basis, information regarding the Fund's top ten holdings. This holdings information may also be made available through the Fund's website and may be released within 10 days of the quarter end.

The Fund's nonpublic portfolio holdings information is received by certain service providers in advance of public release in the course of performing or enabling them to perform the contractual or fiduciary duties necessary for the Fund's operations that the Fund has retained them to perform so long as the disclosure is subject to duties of confidentiality imposed by law and/ or contract as determined by the Fund's officers and, if applicable, the Board. The Fund's portfolio holdings are available in real-time on a daily basis to the Adviser, the Administrator and the Custodian. In addition, the Distributor, the independent auditors, proxy voting services, mailing services, and financial printers and ratings or ranking organizations may have access, but not on a daily real-time basis, to the Fund's nonpublic portfolio holdings information on an ongoing basis. The Trustees, Trust's officers, legal counsel to the Trust and to the Independent Trustees, and the Fund's independent registered public accounting firm may receive such information on an as needed basis.

From time to time, nonpublic information regarding the Fund's portfolio holdings may also be disclosed to certain mutual fund consultants, analysts, or other entities or persons ("Recipients") that have a legitimate business purpose in receiving such information. Any disclosure of information more current than the latest publicly available portfolio holdings information will be made only if a Trust officer determines that: (1) the more current information is necessary for a Recipient to complete a specified task; (2) the Fund has legitimate business purposes for disclosing the information; and (3) the disclosure is in the best interests of the Fund and its shareholders. Any Recipient receiving such information shall agree in writing to: (1) keep the information confidential; (2) use it only for agreed-upon purposes; and (3) not trade or advise others to trade securities, including shares of the Fund, on the basis of the information. Such confidentiality agreements entered into for the receipt of nonpublic information shall also provide, among other things, that the Recipient: (1) will limit access to the information to its employees and agents who are obligated to keep and treat such information as confidential; (2) will assume responsibility for any breach of the terms of the confidentiality agreement by its employees; and (3) upon request from the Trust, will return or promptly destroy the information. The Trust officer shall report to the Board at its next regularly scheduled Board meeting the entering into of an agreement with a Recipient for the disclosure of nonpublic portfolio holdings information and shall include in the report the Trust officer's reasons for determining to permit such disclosure.

The Adviser may provide investment management for accounts of clients other than the Fund, which may result in some of those accounts having a composition substantially similar to that of the Fund. The Adviser and its affiliates may provide regular information to clients and others regarding the holdings in accounts that each manages, but no information is provided to clients or others that identifies the actual composition of the Fund's holdings, specifies the amount of the Fund's assets invested in a security or specifies the extent of any such similarities among accounts managed by the Adviser.

No compensation is received by the Fund, or, to the Fund's knowledge, paid to the Adviser or any other party in connection with the disclosure of the Fund's portfolio holdings. The codes of ethics of the Trust and the Adviser are intended to address, among other things, potential conflicts of interest arising from the misuse of information concerning the Fund's portfolio holdings. In addition, the Fund's service providers may be subject to confidentiality provisions contained within their service agreements, codes of ethics, professional codes, or other similar policies that address conflicts of interest arising from the misuse of such information.

The Adviser, Administrator and Distributor must inform a Trust officer if it identifies any conflict between the interests of shareholders and those of another party resulting from the disclosure of nonpublic portfolio holdings information. Such conflicts will be reported to the Board for appropriate action at its next regularly scheduled meeting.

There is no assurance that the Fund's portfolio holdings disclosure policy will protect the Fund against potential misuse of holdings information by individuals or firms in possession of that information.

PURCHASE AND REDEMPTION INFORMATION

A. General Information

You may effect purchases or redemptions or request any shareholder privilege by contacting the Transfer Agent.

The Fund accepts orders for the purchase or redemption of shares of the Fund on any weekday except days when the New York Stock Exchange (the “NYSE”) is closed. Under unusual circumstances, the Fund may accept orders when the NYSE is closed if deemed appropriate by the Trust’s officers.

The shares of the Fund may not be available for sale in the state in which you reside. Please check with your investment professional to determine the Fund’s availability.

B. Additional Purchase Information

Shares of the Fund are offered on a continuous basis by the Distributor.

The Fund reserves the right to refuse any purchase request.

Fund shares are normally issued for cash only. In its discretion, the Fund may accept portfolio securities that meet the investment objective and policies of the Fund as payment for Fund shares. The Fund may allow an in kind purchase provided that, among other things: (i) the purchase will not dilute the interests of its shareholders; (ii) the assets accepted by the Fund consist of securities that are appropriate, in type and amount, for investment by the Fund in light of its investment objective and policies and current holdings; (iii) market quotations are readily available for the securities; (iv) in determining the value of the assets contributed and the corresponding amount of shares issued, the Trust’s Valuation Policy will be applied; (v) the transaction must comply with the Trust’s Affiliated Persons and Transactions Policy if the person investing is an affiliated person; and (vi) the Adviser to the Fund discloses to the Board the existence of, and all material facts relating to, any conflicts of interest between the Adviser and the Fund in the proposed in-kind purchase.

IRAs. All contributions into an individual retirement account (an “IRA”) through the automatic investing service are treated as IRA contributions made during the year that the contribution is received.

UGMAs/UTMAs. If the custodian’s name is not in the account registration of a gift or transfer to minor (“UGMA/UTMA”) account, the custodian must provide instructions in a manner indicating custodial capacity.

C. Additional Redemption Information

You may redeem Fund shares at NAV.

The Fund may reverse a transaction for the purchase of Fund shares within two business days of notification from your bank that your funds did not clear (1) to collect any charge relating to transactions effected for the benefit of a shareholder that is applicable to the Fund’s shares as provided in the Prospectus or (2) to recoup any actual losses incurred by the Fund or the Transfer Agent in connection with any reversed transaction.

Suspension of Right of Redemption. The right of redemption may not be suspended for more than seven days after the tender of Fund shares, except for any period during which: (1) the NYSE is closed (other than customary weekend and holiday closings) or during which the SEC determines that trading thereon is restricted; (2) an emergency (as determined by the SEC) exists as a result of which disposal by the Fund of its securities is not reasonably practicable or as a result of which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (3) the SEC has entered a suspension order for the protection of the shareholders of the Fund.

Redemption in Kind. Redemption proceeds normally are paid in cash. If deemed appropriate and advisable by the Adviser, the Fund may satisfy a redemption request from a shareholder by distributing portfolio securities pursuant to procedures adopted by the Board. The Trust has filed an election with the SEC pursuant to which the Fund may effect a redemption in portfolio securities only if the particular shareholder is redeeming more than \$250,000 or 1% of the Fund’s total net assets, whichever is less, during any 90-day period.

NAV Determination. In determining the NAV of the Fund, securities for which market quotations are readily available are valued at current market value using the valuation price from the primary exchange where the security is listed, as provided by an independent pricing service or, if no sales price is reported, the mean of the last bid and ask prices. If market

quotations are not readily available, then securities are valued at fair value as determined by the Board (or its delegate). For further information, see the “General Information” section in the Prospectus.

Distributions. Distributions of net investment income will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) as of the last day of the period with respect to which the distribution is paid. Distributions of net realized capital gains will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested.

TAXATION

The tax information set forth in the Prospectus and in this section relates solely to federal tax law and assumes that the Fund qualifies for treatment as a RIC (as discussed below). This information is only a summary of certain key federal income tax considerations affecting the Fund and its shareholders and is in addition to the tax information provided in the Prospectus. No attempt has been made to present a complete explanation of the federal tax treatment of the Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

This “Taxation” section is based on the IRC, the regulations thereunder, and IRS interpretations and similar authority on which the Fund may rely, all as in effect on the date hereof, as well as on court decisions publicly available through that date. Future legislative, regulatory, or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

Each investor should consult his or her own tax advisor as to the federal, state, local, and foreign tax provisions applicable to the investor.

A. Qualification for Treatment as a Regulated Investment Company

The Fund intends, for each taxable year, to qualify for treatment as a RIC. This qualification does not involve governmental supervision of management or investment practices or policies of the Fund.

The taxable year-end of the Fund is April 30, which is the same as its fiscal year-end.

Consequences of Qualification. As a RIC, the Fund will not be subject to federal income tax on the portion of its investment company taxable income (generally, interest, dividends, other ordinary income, the excess of net short-term capital gain over net long-term capital loss, and net gains and losses from certain foreign currency transactions, net of expenses, all determined without regard to any deduction for dividends paid) and net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss) that it distributes to its shareholders. To qualify to be taxed as a RIC for a taxable year, the Fund must satisfy the following requirements, among others:

- The Fund must distribute at least the sum of 90% of its investment company taxable income plus 90% of its net interest income excludable from gross income under IRC Section 103(a) for the taxable year (“Distribution Requirement”). Certain distributions made by the Fund after the close of its taxable year are considered distributions attributable to that taxable year for purposes of satisfying this requirement.
- The Fund must derive at least 90% of its gross income for the taxable year from (1) dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of securities or foreign currencies, or other income (including gains from options) derived from its business of investing in securities or those currencies and (2) net income from an interest in a “qualified publicly traded partnership” (“QPTP”) (income described in (1) and (2) collectively “Qualifying Income”) (“Gross Income Requirement”). A QPTP is defined as a “publicly traded partnership” (generally, a partnership the interests in which are “traded on an established securities market” or are “readily tradable on a secondary market (or the substantial equivalent thereof)”) that derives less than 90% of its gross income from sources described in clause (1).
- The Fund must satisfy the following asset diversification requirements (“Diversification Requirements”) at the close of each quarter of its taxable year: (1) at least 50% of the value of its total assets must consist of cash and cash items, Government securities, securities of other RICs, and securities of other issuers, with these other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the Fund’s total assets and that does not represent more than 10% of the issuer’s outstanding voting securities (equity securities of a QPTP being considered voting securities for these purposes); and (2) no more than 25% of the value of its total assets may be invested in (a) the securities of any one issuer (other than Government securities and securities of other RICs), (b) the securities (other than securities of other RICs) of two or more issuers that the Fund controls and that are engaged in the same, similar, or related trades or businesses, or (c) the securities of one or more QPTPs.

Failure to Qualify. If for any taxable year the Fund does not qualify for treatment as a RIC, either (1) by failing to satisfy the Distribution Requirement, even if it satisfied the Gross Income Requirement and the Diversification Requirements, or (2) by failing to satisfy the Gross Income Requirement and/or either Diversification Requirement and being unable, or determining not, to cure the failure in the manner described in the next two paragraphs, then for federal income tax purposes all of its

taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for dividends paid to its shareholders. In addition, for those purposes the dividends would be taxable to the shareholders as ordinary income to the extent of the Fund's current and accumulated earnings and profits, except that, for (a) individual and certain other non-corporate shareholders (each, an "individual shareholder"), the part thereof that is "qualified dividend income" would be subject to federal income tax at the rates for net capital gain, which are a maximum of 15% for an individual shareholder with taxable income not exceeding certain thresholds and 20% for individual shareholders with taxable income exceeding the thresholds (which will be adjusted for inflation annually), and (b) those dividends would be eligible for the dividends-received deduction available to corporations under certain circumstances. Furthermore, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying for RIC treatment.

If the Fund fails to satisfy the Gross Income Requirement for any taxable year, it nevertheless will be considered to have satisfied that requirement for that year if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund pays a tax in an amount equal to the excess of its gross income that is not Qualifying Income over one-ninth of its gross income that is Qualifying Income.

If the Fund fails to satisfy either Diversification Requirement at the close of any quarter of its taxable year by reason of a discrepancy existing immediately after its acquisition of any security that is wholly or partly the result of that acquisition during that quarter, it will not lose its status for that quarter as a RIC if the discrepancy is eliminated within 30 days after the quarter's close. If the Fund fails to satisfy either or both Diversification Requirement(s) (other than a *de minimis* failure, as described in the IRC) for a quarter and the preceding sentence does not apply, it nevertheless will be considered to have satisfied those requirements for that quarter if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund disposes of the assets that caused the failure within six months after the last day of the quarter in which it identifies the failure in the manner prescribed by the IRS. In that case, the Fund will also be liable for a federal tax equal to the greater of \$50,000 or the amount determined by multiplying the net income generated by those assets for the period from the date the failure occurs to the date of disposition thereof by the highest rate of federal income tax applicable to corporations (currently 35%).

Failure to qualify for treatment as a RIC would thus have a negative impact on the Fund's after-tax performance. It is possible that the Fund will not qualify as a RIC in any given taxable year.

B. Fund Distributions

The Fund anticipates distributing substantially all of its investment company taxable income and net-exempt interest income, if any, for each taxable year. These distributions will be taxable to a shareholder as ordinary income, but, as described in the Prospectus, a portion of the distributions may be treated as "qualified dividend income" and thus eligible to be taxed to individual shareholders at the lower maximum federal income tax rates applicable to net capital gain.

The Fund anticipates distributing substantially all of its net capital gain (after reduction for any capital loss carryovers, *i.e.*, unutilized realized net capital losses from prior taxable years) for each taxable year. These distributions generally will be made only once a year, usually in December, but the Fund may make a limited number of additional distributions of net capital gain at any time during the year. These distributions will be taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held his or her shares. These distributions will not qualify for the dividends-received deduction or as "qualified dividend income."

A distribution by the Fund that does not constitute an ordinary income dividend or capital or foreign currency gain distribution will be treated as a non-taxable "return of capital." A return of capital distribution will reduce a shareholder's tax basis in Fund shares and will be treated as gain from the sale of the shares to the extent it exceeds the shareholder's basis.

Non-U.S. investors not engaged in a U.S. trade or business with which their investment in the Fund is "effectively connected" will be subject to U.S. federal income tax treatment that is different from that described above. Such non-U.S. investors may be subject to withholding tax at the rate of 30% (or a lower rate under an applicable tax treaty) on amounts treated as ordinary dividends from the Fund. Capital gain distributions, if any, are not subject to the 30% withholding tax. Exemption from this withholding tax is also provided for dividends properly reported in writing by the Fund to its shareholders as "interest-related dividends" or as "short-term capital gain dividends" paid by the Fund with respect to its "qualified net interest income" or "qualified short-term gain," respectively (all such terms as defined in the IRC). Non-U.S. investors will need to provide an effective IRS Form W-8BEN or other authorized withholding certificate to qualify for the exemption.

Each distribution by the Fund will be treated in the manner described above regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another fund). If a shareholder reinvests a distribution in additional shares, the shareholder will be treated as having received a distribution in an amount equal to the fair market value of the reinvested shares, determined as of the reinvestment date.

When a shareholder purchases shares of the Fund, the purchase price (NAV) will include any undistributed net investment income and realized net capital gains and foreign currency gains and any unrealized appreciation in the value of the assets of the Fund. A distribution of that income or gain (including net gain, if any, from realizing all or part of that appreciation) will be taxable to a shareholder in the manner described above, even if the distribution economically constitutes a partial return of invested capital to the shareholder.

Ordinarily, a shareholder is required to take taxable distributions by the Fund into income in the year in which they are made. A distribution declared in October, November, or December of any year and payable to shareholders of record on a specified date in one of those months, however, is deemed to be paid by the Fund and received by those shareholders on December 31 of that year if the distribution is paid in January of the following year.

The Fund will send information annually to its shareholders regarding the federal income tax status of distributions made (or deemed made) during the year.

C. Foreign Account Tax Compliance Act (“FATCA”)

Under FATCA, foreign financial institutions (“FFIs”) and non-financial foreign entities (“NFFEs”) that are Fund shareholders may be subject to a generally nonrefundable 30% withholding tax on (1) income dividends the Fund pays and (2) certain capital gain distributions and the proceeds of a redemption of Fund shares that are paid after December 31, 2018. As discussed more fully below, the FATCA withholding tax generally may be avoided (a) by an FFI, if it reports certain information regarding direct and indirect ownership of financial accounts U.S. persons hold with the FFI, and (b) by an NFFE that certifies its status as such and, in certain circumstances, reports information regarding substantial U.S. owners.

An FFI may avoid FATCA withholding by becoming a “participating FFI,” which requires the FFI to enter into a tax compliance agreement with the IRS under the IRC. Under such an agreement, a participating FFI agrees to (1) verify and document whether it has U.S. accountholders, (2) report certain information regarding their accounts to the IRS, and (3) meet certain other specified requirements.

The U.S. Treasury Department has negotiated intergovernmental agreements (each, an “IGA”) with certain countries and is in various stages of negotiations with other foreign countries with respect to one or more alternative approaches to implement FATCA; entities in those countries may be required to comply with the terms of the relevant IGA instead of U.S. Treasury regulations. An FFI resident in a country that has entered into a Model I IGA with the United States must report to that country’s government (pursuant to the terms of the applicable IGA and applicable law), which will, in turn, report to the IRS. An FFI resident in a Model II IGA country generally must comply with U.S. regulatory requirements, with certain exceptions, including the treatment of recalcitrant accountholders. An FFI resident in one of those countries that complies with whichever of the foregoing applies will be exempt from FATCA withholding.

An NFFE that is the beneficial owner of a payment from the Fund may avoid FATCA withholding generally by certifying its status as such and, in certain circumstances, either that (1) it does not have any substantial U.S. owners or (2) it does have one or more such owners and reports the name, address, and taxpayer identification number of each such owner. The NFFE will report to the Fund or other applicable withholding agent, which may, in turn, report information to the IRS.

Those foreign shareholders also may fall into certain exempt, excepted, or deemed compliant categories established by U.S. Treasury regulations, IGAs, and other guidance regarding FATCA. An FFI or NFFE that invests in the Fund will need to provide the Fund with documentation properly certifying the entity’s status under FATCA to avoid FATCA withholding. The requirements imposed by FATCA are different from, and in addition to, the tax certification rules to avoid backup withholding described in the Prospectus. Foreign investors are urged to consult their tax advisors regarding the application of these requirements to their own situations and the impact thereof on their investment in the Fund.

D. Redemption of Shares

In general, you will realize gain or loss on redemption of Fund shares in an amount equal to the difference between the proceeds of the redemption and your adjusted tax basis in the shares. All or a portion of any loss so realized will be disallowed if you purchase Fund shares (for example, by reinvesting distributions) within 30 days before or after the redemption (*i.e.*,

a “wash” sale); if disallowed, the loss would be reflected in an upward adjustment to the basis in the purchased shares. In general, any gain or allowed loss arising from a redemption of shares of the Fund will be considered a capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from a redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain, if any, received on such shares. In determining the holding period of shares for this purpose, any period during which your risk of loss is offset by means of an option, short sale, or similar transaction is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

E. Federal Excise Tax

A 4% non-deductible federal excise tax (“Excise Tax”) is imposed on a RIC that fails to distribute in each calendar year an amount equal to at least the sum of (1) 98.0% of its ordinary income for the year plus (2) 98.2% of its capital gain net income for the one-year period ended on October 31 of the year plus (3) any ordinary income and capital gain net income for previous years that were not distributed during those years. The Fund will be treated as having distributed any amount on which it is subject to income tax for any taxable year ending in the calendar year.

For purposes of calculating the Excise Tax, the Fund (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year and (2) excludes foreign currency gains and losses realized or sustained after October 31 of any year in determining the amount of ordinary income for that calendar year and includes them in determining the amount of ordinary income for the succeeding calendar year.

The Fund intends to make sufficient distributions each year of its ordinary income and capital gain net income to avoid liability for the Excise Tax. The Fund may in certain circumstances be required to liquidate portfolio investments to make distributions sufficient to avoid that liability.

F. Certain Tax Rules Applicable to Fund Transactions

Investments in Derivatives. When a put or call option purchased by the Fund expires unexercised, the premium it paid gives rise to short-term or long-term capital loss at the time of expiration (depending on the length of the exercise period for the option). When a put or call option written by the Fund expires unexercised, the premium it received gives rise to short-term capital gain at the time of expiration. When the Fund exercises a call option, the basis in the underlying security is increased by the amount of the premium it paid for the option. When the Fund exercises a put option, the gain (or loss) from the sale of the underlying security is decreased (or increased) by the premium it paid for the option. When a put or call option written by the Fund is exercised, the purchase price (or the selling price in the case of a call) of the underlying security is decreased (or increased in the case of a call) for federal income tax purposes by the amount of the premium received.

Some futures contracts, foreign currency contracts, and “nonequity” options (*i.e.*, certain listed options, such as those on a “broad-based” securities index) in which the Fund invests - except any “securities futures contract” that is not a “dealer securities futures contract” (both as defined in the IRC) and any interest rate swap, currency swap, basis swap, interest rate cap, interest rate floor, commodity swap, equity swap, equity index swap, credit default swap, or similar agreement - may be subject to IRC section 1256 (“Section 1256 contracts”). Any Section 1256 contracts the Fund holds at the end of its taxable year (and generally for purposes of the Excise Tax, on October 31 of each year) must be “marked to market” (that is, treated as having been sold at that time for their fair market value) for federal tax purposes, with the result that unrealized gains or losses will be treated as though they were realized. Sixty percent of any net gain or loss realized on these deemed sales, and 60% of any net realized gain or loss from any actual sales of Section 1256 contracts, will be treated as long-term capital gain or loss, and the balance will be treated as short-term capital gain or loss; however, certain foreign currency gains or losses arising from Section 1256 contracts will be treated as ordinary income or loss. These rules may operate to increase the amount that the Fund must distribute to satisfy the Distribution Requirement (*i.e.*, with respect to the portion treated as short-term capital gain, which will be includible in its investment company taxable income and thus taxable to its shareholders as ordinary income when distributed to them), and to increase the net capital gain the Fund recognizes, even though the Fund may not have closed the transactions and received cash to pay the distributions. The Fund may elect not to have the foregoing rules apply to any “mixed straddle” (that is, a straddle, which the Fund clearly identifies in accordance with applicable regulations, at least one (but not all) of the positions of which are Section 1256 contracts), although doing so may have the effect of increasing the relative proportion of short-term capital gain (distributions of which are taxable to its shareholders as ordinary income) and thus increasing the amount of dividends it must distribute.

Any option or other position entered into or held by the Fund in conjunction with any other position it holds may constitute a “straddle” for federal income tax purposes. In general, straddles are subject to certain rules that may affect the amount, character, and timing of recognition of the Fund’s gains and losses with respect to the straddle positions by requiring, among other things, that (1) any loss realized on disposition of one position of a straddle not be recognized to the extent that the Fund has unrealized gains with respect to the other positions in the straddle, (2) the Fund’s holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term rather than long-term capital gain), (3) the losses recognized with respect to certain straddle positions that are part of a mixed straddle and are non-Section 1256 contracts be treated as 60% long-term and 40% short-term capital loss, and (4) losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses be treated as long-term capital losses. In addition, the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to the Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles. In general, the foregoing rules do not apply to any straddles held by the Fund if all of the offsetting positions consist of Section 1256 contracts.

Investments in Foreign Currencies and Securities. Gains or losses attributable to fluctuations in exchange rates that occur between the time that the Fund accrues interest, dividends or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time that the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary losses. Similarly, gains or losses from the disposition of a foreign currency, or from the disposition of a fixed-income security denominated in a foreign currency that are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the security and the date of its disposition, also are treated as ordinary income or ordinary losses. These gains or losses increase or decrease the amount of the Fund’s investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of its net capital gain.

If the Fund owns shares in a foreign corporation that constitutes a “passive foreign investment company” for federal tax purposes (a “PFIC”) and the Fund does not make either of the elections described in the next two paragraphs, it will be subject to federal income tax on a portion of any “excess distribution” it receives from the PFIC and any gain it derives from the disposition of such shares (collectively, “PFIC Income”), even if it distributes the PFIC Income as a taxable dividend to its shareholders. The Fund will also be subject to additional interest charges in respect of deferred taxes arising from the PFIC Income. Any such tax paid by the Fund as a result of its ownership of shares in a PFIC will not give rise to any deduction or credit to the Fund or to any shareholder. A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests for a taxable year: (1) at least 75% of its gross income is derived from “passive income” (including interest and dividends) or (2) an average of at least 50% of the value (or adjusted tax basis, if elected) of its assets produce, or are held for the production of, “passive income.” The Fund’s distributions of PFIC Income will not be eligible for the 15% and 20% maximum federal income tax rates on individual shareholders’ “qualified dividend income” described in the Prospectus.

The Fund may elect to “mark to market” its stock in a PFIC. Under such an election, the Fund would include in gross income (and treat as ordinary income) each taxable year an amount equal to the excess, if any, of the fair market value of the PFIC stock as of the close of the taxable year over the Fund’s adjusted basis in the PFIC stock. The Fund would be allowed a deduction for the excess, if any, of that adjusted basis over that fair market value, but only to the extent of any net mark-to-market gains included in income by the Fund for prior taxable years. The Fund’s adjusted basis in the PFIC stock would be adjusted to reflect the amounts included in, or deducted from, income under this election. Amounts so included, as well as gain realized on the disposition of the PFIC stock, would be treated as ordinary income. The deductible portion of any mark-to-market loss, as well as any loss realized on the disposition of the PFIC stock to the extent that such loss does not exceed the net mark-to-market gains previously included in income by the Fund, would be treated as ordinary loss. The Fund generally would not be subject to the deferred tax and interest charge provisions discussed above with respect to PFIC stock for which a mark-to-market election has been made.

If the Fund purchases shares in a PFIC and elects to treat the PFIC as a “qualified electing fund,” the Fund would be required to include in its income each taxable year its *pro rata* share of the ordinary income and net capital gains of the PFIC, even if the income and gains were not distributed to the Fund. Any such income would be subject to the Distribution Requirement and the calendar year Excise Tax distribution requirement described above. In most instances it will be very difficult, if not impossible, to make this election because some of the information required to make this election may not be easily obtainable.

Investors should be aware that determining whether a foreign corporation is a PFIC is a fact-intensive determination that is based on various facts and circumstances and thus is subject to change, and the principles and methodology used therein

are subject to interpretation. As a result, the Fund may not be able, at the time it acquires a foreign corporation's shares, to ascertain whether the corporation is a PFIC and that a foreign corporation may become a PFIC after the Fund acquires shares therein. While the Fund generally will seek not to invest in PFIC shares to avoid the tax consequences detailed above, there are no guarantees that it will be able to do so, and it reserves the right to make such investments as a matter of its investment policy.

G. State and Local Taxes

The tax rules of the various states and their local jurisdictions with respect to an investment in the Fund may differ from the federal income tax rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

H. Foreign Income Tax

Investment income received by the Fund from sources within foreign countries and U.S. possessions and gains that the Fund realizes on the disposition of foreign securities (collectively, "foreign source income") may be subject to foreign or possession income or other taxes withheld at the source (collectively, "foreign taxes"). The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of foreign taxes or exemption from taxes on foreign source income. It is impossible to know the effective rate of foreign tax in advance, since the amount of the Fund's assets to be invested within various countries will vary.

I. Capital Loss Carryovers ("CLCOs")

The Fund may sustain net capital losses (*i.e.* realized capital losses in excess of realized capital gains, whether short-term or long-term) for a taxable year. Those losses may be "carried over" (but not "carried back") and used to offset any capital gains realized in a subsequent taxable year for federal income tax purposes. All capital loss carryovers ("CLCOs") available at the close of the Fund's most recently completed taxable year ("available CLCOs") are listed in its financial statements. A Fund's CLCOs may expire; as a result of the Regulated Investment Company Modernization Act of 2010 ("Act"), whether the Fund's CLCOs will expire depends on when they arose. CLCOs that arose in taxable years that began by December 22, 2010, the Act's effective date ("pre-enactment CLCOs"), will expire after eight taxable years and thus will be unavailable to offset net capital gains, if any, that are realized after that period. CLCOs that arose in taxable years that began or arise in taxable years beginning after that date ("post-enactment years"), however, do not expire and may be carried forward indefinitely. Any capital losses that the Fund sustains in post-enactment years must be utilized to offset realized capital gains before pre-enactment CLCOs are so utilized; as a result of this ordering rule, those CLCOs may be more likely to expire unused. Capital losses that arise in post-enactment years and are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term capital losses (as under previous law).

OTHER MATTERS

A. The Trust and Its Shareholders

General Information. The Fund is a separate series of the Trust. The Trust is an open-end investment management company organized under Delaware law as a statutory trust on August 29, 1995. On January 5, 1996, the Trust succeeded to the assets and liabilities of Forum Funds, Inc. The Trust's trust instrument (the "Trust Instrument") permits the Trust to offer separate series ("funds") of shares of beneficial interest ("shares"). The Trust reserves the right to create and issue shares of additional funds. The Trust and each fund will continue indefinitely until terminated. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund and all assets of such fund belong solely to that fund and would be subject to liabilities related thereto. The other funds of the Trust are described in one or more separate Statements of Additional Information.

Shareholder Voting and Other Rights. Each share of a fund and each class of shares has equal dividend, distribution, liquidation and voting rights. Fractional shares have those rights proportionately, except that expenses related to the distribution of shares of each fund or class (and certain other expenses such as transfer agency, shareholder service and administration expenses) are borne solely by those shares. Each fund or class votes separately with respect to the provisions of any Rule 12b-1 plan that pertains to the fund or class and other matters for which separate fund or class voting is appropriate under applicable law. Generally, shares will be voted separately by each fund except if: (1) the 1940 Act requires shares to be voted in the aggregate and not by individual funds; or (2) the Board determines that the matter affects more than one fund and all affected funds must vote. The Board may also determine that a matter only affects certain funds or classes of the Trust and thus that only those funds or classes are entitled to vote on the matter. Delaware law does not require the Trust to hold annual meetings of shareholders, and it is anticipated that shareholder meetings will be held only when specifically required by federal or state law. There are no conversion or preemptive rights in connection with shares of the Trust.

All shares, when issued in accordance with the terms of the offering, will be fully paid and non-assessable.

A shareholder in a fund is entitled to the shareholder's pro rata share of all distributions arising from that fund's assets and, upon redeeming shares, will receive the portion of the fund's net assets represented by the redeemed shares.

Shareholders representing 10% or more of the Trust's (or a fund's) shares may, as set forth in the Trust Instrument, call meetings of the Trust (or fund) for any purpose related to the Trust (or fund), including, in the case of a meeting of the Trust, the purpose of voting on removal of one or more Trustees.

Termination or Reorganization of Trust or its Series. The Board, may, without prior shareholder approval, change the form of organization of the Trust by merger, consolidation or incorporation, so long as the surviving entity is an open-end management investment company. Under the Trust Instrument, the Trustees may also, without shareholder vote, sell and convey all or substantially all of the assets of the Trust to another trust, partnership, association or corporation, or cause the Trust to incorporate in the State of Delaware, so long as the surviving entity is an open-end management investment company that will succeed to or assume the Trust's registration statement.

Under the Trust Instrument, the Board may sell or convey the assets of a fund or reorganize such fund into another investment company registered under the 1940 Act without a shareholder vote.

B. Fund Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is a shareholder who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund.

As of August 6, 2018, the Trustees and officers of the Trust in aggregate owned less than 1% of the outstanding shares of beneficial interest of the Fund.

As of August 6, 2018, certain shareholders listed in Table 5 in Appendix B owned of record or beneficially 5% or more of the shares of the Fund.

As of August 6, 2018, no shareholder owned of record or beneficially 25% or more of the Fund's voting securities.

C. Limitations on Shareholders' and Trustees' Liability

Delaware law provides that Fund shareholders are entitled to the same limitations of personal liability extended to stockholders of private corporations for profit. In addition, the Trust Instrument contains an express disclaimer of shareholder liability for the debts, liabilities, obligations and expenses of the Trust. The Trust Instrument provides that if any shareholder or former shareholder of any fund is held personally liable, solely by reason of having been a shareholder (and not because of their acts or omissions or for some other reason), the shareholder or former shareholder shall be entitled out of assets belonging to the applicable fund to be held harmless from and indemnified against all losses and expenses arising from such liability. The Trust Instrument also provides that the Trust, on behalf of a fund, shall, upon request by a shareholder or former shareholder, assume the defense of any claim made against any shareholder for any act or obligation of that fund and satisfy any judgment thereon from the assets belonging to the fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which Delaware law does not apply, no contractual limitation of liability is in effect, and the Fund is unable to meet its obligations.

The Trust Instrument provides that the trustees shall not be liable to any person other than the Trust and its shareholders. In addition, the Trust Instrument provides that the trustees shall not be liable for any conduct whatsoever, provided that a trustee is not protected against any liability to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

D. Proxy Voting Procedures

The Trust's and the Adviser's proxy voting procedures are included in Appendices C and D, respectively.

Information regarding how the Fund voted proxies relating to portfolio securities during the 12-month period ended June 30 is available: (1) without charge, upon request, by contacting the Transfer Agent at (855) 392-9331 (toll free); and (2) on the SEC's website at www.sec.gov.

E. Code of Ethics

The Trust and the Adviser have each adopted a code of ethics under Rule 17j-1 of the 1940 Act. These codes are designed to eliminate conflicts of interest between the Fund and personnel of the Trust and the Adviser. The codes permit such personnel to invest in securities, including securities that may be purchased or held by the Fund, subject to certain limitations. The Distributor relies on the principal underwriters exception under Rule 17j-1(c)(3), specifically where the Distributor is not affiliated with the Trust or the Adviser, and no officer, director or general partner of the Distributor serves as an officer, director or general partner of the Trust or the Adviser.

F. Registration Statement

This SAI and the Prospectus do not contain all of the information included in the Trust's registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, may be examined at the office of the SEC in Washington, D.C. The SEC maintains a website (www.sec.gov) that contains this SAI, any material incorporated by reference, and other information regarding the Fund.

G. Financial Statements

The Fund's Financial Statements and Financial Highlights for the fiscal year ended April 30, 2018 are incorporated by reference into this SAI from the Fund's Annual Report to shareholders, have been audited by BBD, an independent registered public accounting firm, as stated in its report, which is incorporated herein by reference, and have been so incorporated in reliance upon reports of such firm, given upon its authority as an expert in accounting and auditing.

The Trust's independent registered public accounting firm, BBD, audits and reports on the Fund's annual financial statements. The financial statements include the schedule of investments, statement of assets and liabilities, statement of operations, statement of changes in net assets, financial highlights, notes and report of independent registered public accounting firm. Shareholders will receive annual audited financial statements and semi-annual unaudited financial statements.

APPENDIX A – DESCRIPTION OF SECURITIES RATINGS

Corporate and Municipal Long-Term Bond Ratings

Standard & Poor’s (“S&P”) Corporate and Municipal Long-Term Bond Ratings:

The following descriptions of S&P’s long-term corporate and municipal bond ratings have been published by Standard & Poor’s Financial Service LLC.

AAA - An obligation rated ‘AAA’ has the highest rating assigned by S&P. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

AA - An obligation rated ‘AA’ differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

A - An obligation rated ‘A’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

BBB - An obligation rated ‘BBB’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C - Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’, and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB - An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

B - An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

CCC - An obligation rated ‘CCC’ is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC - An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C - An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D - An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

Plus (+) or Minus (-) - The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR - This indicates that a rating has not been assigned or is no longer assigned.

Moody's Investors Service, Inc. ("Moody's") Long-Term Corporate Bond Ratings:

The following descriptions of Moody's long-term corporate bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

Aaa - Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa - Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A - Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa - Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess speculative characteristics.

Ba - Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B - Obligations rated B are considered speculative and are subject to high credit risk.

Caa - Obligations rated Caa are judged to be speculative, of poor standing and are subject to very high credit risk.

Ca - Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C - Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Moody's U.S. Municipal Long-Term Bond Ratings:

The following descriptions of Moody's long-term municipal bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

Aaa - Issuers or issues rated Aaa demonstrate the strongest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Aa - Issuers or issues rated Aa demonstrate very strong creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

A - Issuers or issues rated A present above-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Baa - Issuers or issues rated Baa represent average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Ba - Issuers or issues rated Ba demonstrate below-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

B - Issuers or issues rated B demonstrate weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Caa - Issuers or issues rated Caa demonstrate very weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Ca - Issuers or issues rated Ca demonstrate extremely weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

C - Issuers or issues rated C demonstrate the weakest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating category from Aa through Caa. The modifier 1 indicates that the issuer or obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch Ratings Ltd. ("Fitch") Corporate Bond Ratings:

The following descriptions of Fitch's long-term corporate bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

AAA - Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA - Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A - High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB - Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B - Highly speculative. 'B' ratings indicate that material credit risk is present. For performing obligations, default risk is commensurate with the issuer being rated with an Issuer Default Rating ("IDR") in the ranges 'BB' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have extremely high recovery rates consistent with a Recovery Rating of 'RR1' (outstanding recovery prospects given default).

CCC - Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a superior recovery rate consistent with a Recovery Rating of 'RR2' (superior recovery prospects given default).

CC - Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a good recovery rate consistent with a Recovery Rating of 'RR3' (good recovery prospects given default).

C - Exceptionally high levels of credit risk. 'C' indicates exceptionally high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, and the rated obligation is expected to have an average, below-average or poor recovery rate consistent with a Recovery Rating of 'RR4' (average recovery prospects given default), 'RR5' (below average recovery prospects given default) or 'RR6' (poor recovery prospects given default).

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'B' to 'C' rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or Minus (-) The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' obligation rating category, or to corporate finance obligation ratings in the categories below 'B'.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms "investment grade" and "speculative grade" are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. "Investment grade" categories indicate relatively low to moderate credit risk, while ratings in the "speculative" categories either signal a higher level of credit risk or that a default has already occurred.

Fitch's Municipal Bond Long-Term Ratings:

The following descriptions of Fitch's long-term municipal bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

AAA - Highest credit quality. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA - Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A - High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB - Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time.

B - Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC - Substantial credit risk. 'CCC' ratings indicate that default is a real possibility.

CC - Very high levels of credit risk. 'CC' ratings indicate default of some kind appears probable.

C - Exceptionally high levels of credit risk. 'C' ratings indicate default appears imminent or inevitable.

D - Default. 'D' ratings indicate a default. Default generally is defined as one of the following:

- failure to make payment of principal and/or interest under the contractual terms of the rated obligation;
- the bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of the business of an issuer/obligor; or
- the distressed exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation.

Structured Finance Defaults – “Imminent” default, categorized under ‘C’, typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

Additionally, in structured finance transactions, where analysis indicates that an instrument is irrevocably impaired such that it is not expected to pay interest and/or principal in full in accordance with the terms of the obligation’s documentation during the life of the transaction, but where no payment default in accordance with the terms of the documentation is imminent, the obligation will typically be rated in the ‘C’ category.

Structured Finance Writedowns - Where an instrument has experienced an involuntary and, in the agency’s opinion, irreversible “writedown” of principal (*i.e.* other than through amortization, and resulting in a loss to the investor), a credit rating of ‘D’ will be assigned to the instrument. Where the agency believes the “writedown” may prove to be temporary (and the loss may be “written up” again in future if and when performance improves), then a credit rating of ‘C’ will typically be assigned. Should the “writedown” then later be reversed, the credit rating will be raised to an appropriate level for that instrument. Should the “writedown” later be deemed as irreversible, the credit rating will be lowered to ‘D’.

Notes: In the case of structured and project finance, while the ratings do not address the loss severity given default of the rated liability, loss severity assumptions on the underlying assets are nonetheless typically included as part of the analysis. Loss severity assumptions are used to derive pool cash flows available to service the rated liability.

Plus (+) or Minus (-) - The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ Long-Term Rating category, or to Long-Term Rating categories below ‘B’.

Municipal Short-Term Bond Ratings

S&P’s Municipal Short-Term Bond Ratings:

The following descriptions of S&P’s short-term municipal ratings have been published by Standard & Poor’s Financial Service LLC.

SP-1 - Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 - Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 - Speculative capacity to pay principal and interest.

D - ‘D’ is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s Municipal Short-Term Ratings:

The following descriptions of Moody’s short-term municipal ratings have been published by Moody’s Investors Service, Inc. and Moody’s Analytics Inc.

MIG 1 - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch's Municipal Short-Term Credit Ratings:

The following descriptions of Fitch's municipal short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

F1 - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2 - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C - High short-term default risk. Default is a real possibility.

RD - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

D - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Short-Term Credit Ratings

S&P's Short-Term Credit Ratings:

The following descriptions of S&P's short-term credit ratings have been published by Standard & Poor's Financial Service LLC.

A-1 - A short-term obligation rated 'A-1' is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 - A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B - A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

C - A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D - A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

Dual Ratings – Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term

transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

Moody's Short-Term Ratings:

The following descriptions of Moody's short-term credit ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

P-1 - Issuers (or supporting institutions) rated Prime-1 have a superior ability to honor short-term debt obligations.

P-2 - Issuers (or supporting institutions) rated Prime-2 have a strong ability to honor short-term debt obligations.

P-3 - Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to honor short-term obligations.

NP - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Fitch's Short-Term Ratings:

The following descriptions of Fitch's short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

F1 - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2 - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C - High short-term default risk. Default is a real possibility.

RD - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

D - Default. Indicates a broad-based default event for an entity, or the default of a specific short-term obligation.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-term rating category, to categories below 'CCC', or to Short-term ratings other than 'F1'. (The +/- modifiers are only used to denote issues within the CCC category.)

APPENDIX B – MISCELLANEOUS TABLES**Table 1 – Investment Advisory Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived and/or expenses reimbursed by the Adviser, if any, and the actual fees retained by the Adviser. The data is for the last three fiscal years.

Period Ended	Advisory Fees Accrued	Advisory Fees Waived and/ or Expenses Reimbursed	Advisory Fees Received
April 30, 2018	\$68,148	\$143,386	\$0
April 30, 2017	\$50,030	\$50,030	\$0
April 30, 2016	\$36,326	\$36,326	\$0

Table 2 – Administration Fees

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived by Atlantic, if any, and the actual fees retained by Atlantic. The data is for the last three fiscal years.

Period Ended	Administration Fees Accrued	Administration Fees Waived	Administration Fees Received
April 30, 2018	\$160,000	\$85,000	\$75,000
April 30, 2017	\$160,000	\$85,000	\$75,000
April 30, 2016	\$160,000	\$85,000	\$75,000

Table 3 – Commissions

The following table shows the aggregate brokerage commissions of the Fund. The data is for the last three fiscal years.

Period Ended	Aggregate Brokerage Commissions (\$) Paid	Total Brokerage Commissions (\$) Paid to Affiliate of Fund, Adviser or Distributor	% of Brokerage Commissions Paid to Affiliate of Fund, Adviser or Distributor	% of Transactions Executed by Affiliate of Fund, Adviser or Distributor
April 30, 2018	\$3,617	\$0	0%	0%
April 30, 2017	\$2,170	\$0	0%	0%
April 30, 2016	\$3,225	\$0	0%	0%

Table 4 – Securities of Regular Brokers or Dealers

The following table lists the Fund's regular brokers and dealers whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund's holdings of those securities as of the most recent fiscal year ended April 30, 2018.

Regular Broker or Dealer	Value of Securities Held
None	N/A

Table 5 – 5% Shareholders

The following table lists, as of August 6, 2018, the persons who owned of record or beneficially 5% or more of the outstanding shares of the Fund.

Name and Address	% of Fund
MICHAEL C RODGERS REVERE, PA 18953	8.88%

Name and Address	% of Fund
ANN RODGERS REVERE, PA 18953	8.44%

**Forum Funds
Shareholder Voting Policy**

As of December 14, 2012

SECTION 1. BACKGROUND

The Trust exercises its shareholder voting responsibilities as an investor in other issuers as a fiduciary, with the goal of maximizing the value of the Trust's and its shareholders' investments. This Policy details the Trust's policy with respect to shareholder voting.

SECTION 2. ADVISER RESPONSIBILITIES

(A) Delegation by Board. Each Fund has delegated to the Adviser the authority to vote as a shareholder of issuers whose securities are held in its portfolio. The Adviser shall maintain and the Board shall approve voting procedures related to the Adviser acting on behalf of the Fund in accordance with its fiduciary duties and the best interests of Fund shareholders.

(B) Delivery of Proxies. The Adviser is responsible for coordinating the delivery of proxies to be voted by the Custodian to the Adviser or to an agent of the Adviser selected by the Adviser to vote proxies with respect to which the Adviser has such discretion (a "Proxy Voting Service"). Upon request, the Adviser shall provide periodic reports to the Board as to the implementation and operation of its shareholder voting policies and procedures as they relate to the Trust.

(C) Conflicts of Interest. The Trust recognizes that under certain circumstances an Adviser or Proxy Voting Service may have a conflict of interest in voting on behalf of a Fund. A conflict of interest includes any circumstance when the Fund, the Adviser, the Distributor, the Proxy Voting Service or one or more of their Affiliated Persons (including officers, directors and employees) knowingly does business with, receives compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of Fund shareholders in how shares of that issuer are voted.

Each Adviser is responsible for maintaining procedures to identify and address material conflicts of interest and, when applicable, determine the adequacy of a Proxy Voting Service's procedures to identify and address material conflicts of interest.

(D) Voting Record. The Adviser shall be responsible for ensuring a voting record is maintained that includes all instances where the Fund was entitled to vote and will coordinate the annual delivery of such record to the Administrator for purposes of preparing the Trust's annual Form N-PX filing. The voting record shall include the following information required to be reported in Form N-PX:

- (1) The name of the issuer of the security;
- (2) The exchange ticker symbol of the security;
- (3) The CUSIP for the security;
- (4) The shareholder meeting date;
- (5) A brief identification of the matter voted on;
- (6) Whether the matter was proposed by the issuer or by a security holder;
- (7) Whether the Trust cast its vote on the matter;
- (8) How the Trust cast its vote (*e.g.*, for or against proposal, or abstain; for or withhold regarding election of directors); and
- (9) Whether the Trust cast its vote for or against management.

The Adviser shall also be responsible for ensuring information regarding how the Fund voted relating to portfolio securities during the twelve-month period ended June 30 is available on the Fund's website or other location consistent with disclosure in the Fund's registration statement.

SECTION 3: ABSTENTION

The Trust and an Adviser may abstain from shareholder voting in certain circumstances. Abstaining from voting may be appropriate if voting would be unduly burdensome or expensive, or otherwise not in the best interest of a Fund's shareholders.

SECTION 4: BOARD REPORTING AND REVIEW

(A) The Adviser shall submit its voting procedures to the Board for review and approval initially and at the next regularly scheduled meeting of the Board following any material change.

(B) The Adviser shall report to the Board, at least quarterly, whether any conflicts of interest arose while voting as an investor in other issuers and how such conflicts were handled.

APPENDIX D – ADVISER PROXY VOTING PROCEDURES

Policies and Procedures for Proxy Voting by Investment Advisor

Monongahela Capital Management will vote proxies for clients, in a manner consistent with the best interest of its clients.

The client may retain the right to vote their own proxies.

Monongahela Capital Management monitors the corporate and financial activities of the companies in which it invests through its proprietary research. The proxy decisions are made by the investment committee. There may be a wide variety of proposals and the proxies are voted in a manner which MCM believes will enhance shareholder value in the company.

MCM will monitor for potential conflicts of interest for any reason, including employees' personal relationships, management of a pension plan or if the advisor provides services to a company which is soliciting proxies. MCM is unaware of any current circumstances in which the best interests of the client are in conflict with the best interest of MCM: i.e. MCM does not manage a pension plan, administer employee benefits plans, or provide brokerage, underwriting, insurance or banking services to a company whose management is soliciting proxies. Monongahela Capital does not anticipate being involved in a conflict of interest situation.

If a situation would arise in which the best interests of Monongahela Capital Management are in conflict with the best interests of the clients, MCM would contact the clients; advise the clients of the conflict; inform the clients prior to the votes of the way in which they would be voted.

Routine Matters

Proxy ballots routinely present a slate of candidates for the board of directors. The proxies are voted for the management proposed slate of directions unless there is a contested election of directors or there is a question of governance based on MCM's knowledge of the company. MCM would vote these proxies to maintain shareholder value.

Appointment of Auditors

Management recommendations will generally be approved.

Non-Routine Matters

Non routine matters will be evaluated on a case by case basis, with the mandate to maintain or enhance shareholder value. These matters may include, but are not limited to, shareholder proposals, anti-takeover issues, executive compensation, any proposal impacting shareholder rights, corporate re-organization, social or political issues.

Abstention

MCM may abstain from a vote if it determines that it is in the best interests of the client.

Proxy statements will be reviewed upon receipt, and the investment committee of MCM will vote based on their review of the proxy, and their knowledge of the company. The proxies will be voted via the internet, or by phone, per the proxy instructions.

MCM will retain a record of the proxy votes for each company by retaining one copy of the proxy ballot, and noting the votes on that ballot. The ballot will be retained in the proxy folder for the current year, and then ballots will be retained in the IA Compliance files of Monongahela Capital for not less than 5 years.

MCM will not retain copies of the proxies themselves, but will rely on proxy statements filed on the SEC Edgar system.

MCM will maintain a record of client requests for proxy voting information.
